Pachana, Ken Laidlaw, 2014-11-07 Throughout the world the population of older adults continues to grow The rise in geriatric populations has seen an increase in research on clinical diagnostic assessment and treatment issues aimed at this population Clinical geropsychologists have increased their interest both in providing mental health services as well as developing approaches to improve quality of life for all older adults The Oxford Handbook of Clinical Geropsychology is a landmark publication in this field providing broad and authoritative coverage of the research and practice issues in clinical geropsychology today as well as innovations expanding the field's horizons Comprising chapters from the foremost scholars in clinical geropsychology from around the world the handbook captures the global proliferation of activity in this field In addition to core sections on topics such as sources of psychological distress assessment diagnosis and intervention the handbook includes valuable chapters devoted to methodological issues such as longitudinal studies and meta analyses in the field as well as new and emerging issues such as technological innovations and social media use in older populations Each chapter offers a review of the most pertinent international literature outlining current issues as well as important cultural implications and key practice issues where relevant and identifying possibilities for future research and policy applications The book is essential to all psychology researchers practitioners educators and students with an interest in the mental health of older adults In addition health professionals including psychiatrists social workers mental health nurses and trainee geriatric mental health workers will find this an invaluable resource Older adults comprise a growing percentage of the population worldwide Clinical psychologists with an interest in older populations have increased the amount of research and applied knowledge about effectively improving mental health later in life and this book captures that information on an international level The book addresses how to diagnose assess and treat mental illness in older persons as well as ways to improve quality of life in all older persons It has a great breadth of coverage of the area including chapters

spanning how research is conducted to how new technologies such as virtual reality and social media are used with older people to improve mental health. The book would appeal to all psychology researchers, practitioners, educators, and students with an interest in the mental health of older adults. It would also appeal to other health professionals including psychiatrists, social workers, and mental health nurses who work with older people. It is a valuable resource for trainee geriatric mental health workers because it highlights key readings and important practice implications in the field.

Grief and Loss Across the Lifespan Carolyn Ambler Walter, Judith L. M. McCoyd, 2009-03-23

Grief and Loss Across the Lifespan represents a significant advance because it looks at the issues from a bio psychosocial perspective. To a social worker who has worked mainly in a medical and nursing environment, this is a great step forward. Bereavement Care Offers valued sensitivities, knowledge, and insights, and most importantly, age appropriate interventions for a range of significant losses. Counselors will want to keep this indispensable work close at hand.

Kenneth J. Doka, PhD, Author, *Counseling Individuals With Life Threatening Illness*. By taking a lifespan view, this book fills a gap in the literature on loss and grief and takes theory and practice in new and invigorating directions. It will be welcomed by those professionals of all disciplines who daily listen to and help re-write narratives of loss.

Jeffrey S. Applegate, PhD, Professor Emeritus, Graduate School of Social Work, Social Research, Bryn Mawr College. A thorough, thoughtful, sensitive, and up-to-date contribution that may be the best book available today for teaching bereavement, grief, and mourning. Highly recommended for experienced grief professionals as well as for students.

Jeffrey Kauffman, MA, MS, LCSW, BD-CT, CAS, BCETS, Psychotherapist in private practice, Philadelphia, PA. Walter and McCoyd have written a well-organized and comprehensive examination of grief and bereavement that will be useful to the seasoned professional as well as the student new to grief and loss. The historical analysis of grief theory from classic to postmodern is interesting reading and essential for a full understanding of grief and loss in modern society.

Paige E. Payne, MS, MSW, LSW, Support Services Manager, PinnacleHealth Home Care and Hospice, Harrisburg, PA. *Grief and Loss Across the Lifespan* is unique in its treatment of grieving patterns and intervention strategies for different age groups. With this book, students and practitioners will learn how grief is influenced by biological responses to stress, psychological responses to loss, as well as social norms and support networks. The authors utilize a developmental framework as each level of development from infancy through old age is addressed in four ways:

- Reviews normal developmental issues, abilities, and challenges for the age in question.
- Analyzes how individuals of each age cope with serious loss of a significant other and how they may experience life-threatening illness themselves.
- Examines how significant others react to and mourn the death of someone in that age range.
- Identifies the normative losses a person is likely to experience and addresses protective and risky ways of coping with those losses.

The authors review important grief theories such as postmodern and Dual Process Theory and discuss current topics in grief including continuing bonds, meaning-making, ambiguous loss, and disenfranchised loss. With the help of this book, practitioners and students of grief counseling can learn to help patients of all ages understand that loss is at the heart of life.

and growth **The Oxford Handbook of Stress, Health, and Coping** Susan Folkman, 2011 Few publications have changed the landscape of contemporary psychology more than Richard Lazarus and Susan Folkman's landmark work *Stress Appraisal and Coping*. Its publication in 1984 set the course for years of research on the dynamic processes of psychological stress and coping in human beings. Now more than a quarter century later *The Oxford Handbook of Stress Health and Coping* pushes the field even further with a comprehensive overview of the newest and best work in this dynamic subject. Edited by Susan Folkman and comprising chapters by the field's leading scientists, this new volume details the expanded knowledge base that has emerged from extensive research on stress and coping processes over the last several decades. Featuring 22 topic-based chapters, including two by Folkman, this volume offers unprecedented coverage of the two primary research topics related to stress and coping: mitigating stress-related harms and sustaining well-being in the face of stress. Both topics are addressed within their relevant contexts, including chronic illness, calamity, bereavement, and social hardship. *The Oxford Handbook of Stress Health and Coping* is an essential reference work for students, practitioners, and researchers across the fields of health psychology, medicine, and palliative care.

The Oxford Handbook of Human Development and Culture Lene Arnett Jensen, 2015 *The Oxford Handbook of Human Development and Culture* provides a comprehensive synopsis of theory and research on human development, with every chapter drawing together findings from cultures around the world. This includes a focus on cultural diversity within nations, cultural change, and globalization. Expertly edited by Lene Arnett Jensen, the Handbook covers the entire lifespan from the prenatal period to old age. It delves deeply into topics such as the development of emotion, language, cognition, morality, creativity, and religion, as well as developmental contexts such as family, friends, civic institutions, school, media, and work. Written by an international group of eminent and cutting-edge experts, the chapters showcase the burgeoning interdisciplinary approach to scholarship that bridges universal and cultural perspectives on human development. This cultural-developmental approach is a multifaceted, flexible, and dynamic way to conceptualize theory and research that is in step with the cultural and global realities of human development in the 21st century.

Techniques of Grief Therapy Robert A. Neimeyer, 2015-09-25 *Techniques of Grief Therapy: Assessment and Intervention* continues where the acclaimed *Techniques of Grief Therapy: Creative Practices for Counseling the Bereaved* left off, offering a whole new set of innovative approaches to grief therapy to address the needs of the bereaved. This new volume includes a variety of specific and practical therapeutic techniques, each conveyed in concrete detail and anchored in an illustrative case study. *Techniques of Grief Therapy: Assessment and Intervention* also features an entire new section on assessment of various challenges in coping with loss, with inclusion of the actual scales and scoring keys to facilitate their use by practitioners and researchers. Providing both an orientation to bereavement work and an indispensable toolkit for counseling survivors of losses of many kinds, this book belongs on the shelf of both experienced clinicians and those just beginning to delve into the field of grief therapy.
