Bangladesh's Graduation from the Least Developed Countries Group Debapriya Bhattacharya, 2018-09-21 Since the group of least developed countries LDCs was identified in 1971 only five countries have graduated from the group all of which are characterised by small size or population The projections are that the next decade will see a rapid increase in the pace of graduation with Bangladesh in particular poised to be one of the largest countries in terms of its economy and population yet to leave the group While previously many LDCs viewed the prospect of graduation with some apprehension fearing significant erosion of international support increasingly the move is being seen as a more positive landmark This book aims to articulate appropriate strategies and initiatives to help Bangladesh to maintain its developmental momentum and to prepare for a sustainable graduation in 2024 In doing so the book explores themes such as key analytical issues of the LDC graduation paradigm smooth transition and structural transformation and post graduation challenges and opportunities Further against the backdrop of Gross National Income per capita the Human Assets Index and Economic Vulnerability Index goals required for graduation the Sustainable Development Goals SDGs set by the 2030 Agenda will also be in the process of implementation Whilst some feel that the two agendas might be in conflict the book teases out some of the important synergies which can be drawn when LDCs are undertaking the journey of graduation in the era of the SDGs The book also takes into cognisance the uncertain external environment and the emerging global scenario within which Bangladesh's graduation is to take place Conceptual discourse around LDC graduation and the particular narrative around Bangladesh's journey towards LDC graduation will be of interest not only to scholars of Bangladesh but also to researchers and policymakers with an interest in LDC graduation for other countries facing similar challenges
