

Basic Java Interview Questions And Answers

1. Why is the main method static ?

Ans: So that it can be invoked without creating an instance of that class

2. What is the difference between class variable, member variable and automatic(local) variable ?

Ans: - class variable is a static variable and does not belong to instance of class but rather shared across all the instances
- member variable belongs to a particular instance of class and can be called from any method of the class
- automatic or local variable is created on entry to a method and has only method scope

3. When are static and non static variables of the class initialized ?

Ans: The static variables are initialized when the class is loaded Non static variables are initialized just before the constructor is called

4. When are automatic variable initialized ?

Ans: Automatic variable have to be initialized explicitly

5. What is a modulo operator % ?

Ans: This operator gives the value which is related to the remainder of a division.e.g
 $x=7\%4$ gives remainder 3 as an answer

6. How is an argument passed in java, by copy or by reference What is a modulo operator % ?

Ans: This operator gives the value which is related to the remainder of a division.e.g
 $x=7\%4$ gives remainder 3 as an answer

7. What is garbage collection ?

Ans: The runtime system keeps track of the memory that is allocated and is able to determine whether that memory is still useable. This work is usually done in background by a low-priority thread that is referred to as garbage collector. When the gc finds memory that is no longer accessible from any live thread it takes steps to release it back to the heap for reuse

8. Does System.gc and Runtime.gc() guarantee garbage collection ?

Ans: No

9. What are different types of operators in Java ?

Ans: - Unary ++, --, +, -, !, ~, ()

- Arithmetic *, /, %, +, -

-Shift <<, >>, >>>

- Comparison ==, instanceof, !=Bitwise &, ^, |Short Circuit &&, ||

Wide range of questions which cover not only basics in Java Language but also most advanced and complex questions which will help freshers, experienced professionals, senior developers, testers to crack their interviews.

Java Interview Questions and Answers

Navneet Singh, Java interview questions often cover a broad range of topics including core Java concepts, object-oriented programming principles, data structures, algorithms, Java APIs, and best practices. Here are some common Java interview questions along with sample answers.

What is Java? Java is a high-level object-oriented programming language developed by Sun Microsystems, now owned by Oracle. It is designed to be platform-independent, allowing developers to write code once and run it on any Java-enabled platform without recompilation.

What are the main features of Java? Some of the main features of Java include:

- Platform independence:** Java programs can run on any platform with a Java Virtual Machine (JVM).
- Object-oriented:** Java supports object-oriented programming principles such as encapsulation, inheritance, and polymorphism.
- Robustness:** Java provides strong memory management, exception handling, and type checking mechanisms to ensure robust and reliable code.
- Multi-threading:** Java supports concurrent execution of multiple threads, allowing developers to write scalable and responsive applications.
- Portability:** Java programs are portable across different platforms, making them suitable for developing cross-platform applications.

What is the difference between JDK, JRE, and JVM?

- JDK (Java Development Kit):** A software development kit that includes tools for developing and compiling Java applications, such as the Java compiler (javac) and the Java runtime environment (JRE).
- JRE (Java Runtime Environment):** A runtime environment that provides the necessary libraries and components to run Java applications. It includes the JVM, Java Virtual Machine, and core Java libraries.
- JVM (Java Virtual Machine):** An abstract computing machine that provides an execution environment for Java bytecode. It interprets and executes Java bytecode instructions and manages memory, threads, and other runtime aspects of Java applications.

What is the difference between abstract class and interface in Java?

An abstract class is a class that cannot be instantiated and may contain abstract methods (methods without a body) as well as concrete methods. It can also contain instance variables and constructors. Subclasses of an abstract class must implement all abstract methods or be declared abstract themselves.

An interface is a reference type in Java that defines a contract of methods that a class must implement. It can only contain constant variables and method signatures without method bodies. A class can implement multiple interfaces but can only extend one abstract class.

What is the difference between ArrayList and LinkedList in Java?

ArrayList is implemented as a dynamic array, meaning that it stores elements in a contiguous memory location and supports random access to elements using an index. It is efficient for accessing elements by index but less efficient for inserting or removing elements from the middle of the list.

LinkedList is implemented as a doubly linked list, meaning that it stores elements as nodes with references to both the previous and next nodes. It is efficient for inserting or removing elements from the middle of the list but less

efficient for random access These are just a few examples of Java interview questions Depending on the role and level of the interview questions may cover more advanced topics such as design patterns concurrency memory management and performance optimization It s important to thoroughly prepare for interviews by reviewing core Java concepts practicing coding exercises and gaining hands on experience with Java programming [Cracking the Java Coding Interview](#) Harry - Anonymous Hacktivist.,2014-07-28 Essential JAVA Interview Skills Made Easy The main objective of this interview book is not to give you just magical interview question tricks I have followed a pattern of improving the question solution with deep Questions Answers explanations with different interview complexities for each interview problem you will find multiple solutions for complex interview questions I mentioned approx 2000 Java Technical Questions and 200 Non Technical Questions for before the technical round This book is world s Biggest Java Interview book you ever read What Special In this book I covered and explained several topics of latest Java 8 Features in detail for Developers Freshers Topics Like Lambdas Java 8 Functional interface Stream and Time API As a job seeker if you read the complete book with good understanding seriously i am 101% sure you will challenge any Interview Interviewers Specially Java in this world and this is the objective of this book This book contains more than Two Thousands Technical Java Questions and 200 Non Technical Questions like before This book is very much useful for I T professionals and the students of Engineering Degree and Masters during their Campus Interview and academic preparations If you read as a student preparing for Interview for Computer Science or Information Technology the content of this book covers all the required topics in full details While writing the book an intense care has been taken to help students who are preparing for these kinds of technical interview rounds Hello Now I want to share something important with you For those of you new to IT Technical or any other job interviews the process can seem overwhelming Interviewers throw questions at you expect you to whip up brilliant algorithms or Program Codes on the spot and then ask you to write beautiful code on a whiteboard luckily everyone else is in the same boat and you re already working hard to prepare Good job So throw the ball back in the interviewer s court Inside Complete Chapters at a Glance 01 Preface Hold On First Read It It will Help You 02 Interview Myths 03 Convincing them you re right for the job 04 Can you do the job 05 Your potential to tackle New Tasks 06 Employers Love Motivated Employees 07 The Big Five Questions 08 Building Rapport and Trust 09 Ten Effective Answers To Common Questions 10 The Apple Interview 11 The Google Interview 12 The Microsoft Interview 13 The Yahoo Interview 14 The Facebook Interview 15 Interview FAQ S I16 How to Prepare for Technical Questions 17 Handling Technical Questions in easy way 18 Top Ten Mistakes Candidates Make 19 The 16 Most Revealing Interview Questions Answers 20 Java Interview Questions Answers 350 Q A PART 1 21 Java Interview Questions Answers 350 Q A PART 2 22 Java Interview Questions Answers 250 Q A PART 3 23 Top 10 Adv Java Que Ans for Experienced Programmers 24 Java Random All In One Que Answers 050 Q A PART 4 25 Java Random All In One Que Answers 250 Q A PART 5 26 Java Concurrency Interview Que Answers 27 Java Collection Interview Que Answers 40 28 Java Exception
