data on such pressing issues as sustainable take control of invasives and species reintroduction Authored by leading  
researchers in wildlife science each chapter considers the structure of data in relation to a particular analytical technique as  
well as the structure of variation in those data Providing conceptual and quantitative overviews of modern analytical methods

*Value Based Performance Measures* Nils  
Eikermann, 2020-08-19 Nils Eikermann describes the framework conditions for the application of value based performance  
measures and critically analyses selected ones The disclosure of value based performance indicators is important in order to  
demonstrate the successful management of a company and to satisfy the increasing information needs of investors However  
companies adapt the developed theoretical concepts of value based performance measures to their practical needs and thus  
investors are no longer able to compare the performance of companies In addition there is a variety of different metrics from  
which companies can choose The empirical study aims to reduce existing research gaps and is divided into three parts the  
analysis of annual reports of selected European companies the calculation of a standardised value based performance  
measure and a value relevance study in the form of an association study
