Bbc Gcse Bitesize The 1920s Overview:

Digital New Deal Riccardo Genghini, 2021-11-15 *Digital New Deal* analyses the origins of law and its relationship to language and economics and identifies 12 symptoms that point to an authoritarian involution of our democracies. It refuses to indulge in pro forma techno optimism. Neither does it pessimistically predict inescapable doom. A bright future is still possible if we correctly understand the digital equivalents of categories such as identity, persona, home, document, signature, freedom, and the close relationship between our fundamental rights and their digital equivalents. Riccardo Genghini's research on a natural law for a digital society has been influenced in particular by Galgano, Popper, Sebeok, Rawls, Ong, Irti, Searle, and Ferraris. As professor at the Università Cattolica del Sacro Cuore in Milano, his lessons 2007-2017 on commercial law focussed on comparing the law merchant of the Middle Ages with the commercial practices of IT companies as Microsoft, eBay, Amazon, Apple, Google, Facebook, and Microsoft. First with CEN, now with ETSI, he steers the European standardisation on PKI and trust services since 1999.
