

Georges Lemaître

(1894-1966) Astronomer, Physicist, Catholic Priest
FATHER OF THE BIG BANG & MODERN COSMOLOGY

Fr Georges Lemaître, a Belgian priest and astrophysicist, published a paper in 1927 in the *Annals of the Scientific Society of Brussels* that first presented the idea of an expanding cosmos. In 1931, Fr Lemaître proposed what later became known as the Big Bang theory of the origin of the universe.

The Catholic Church honoured Fr Lemaître's work. He was elected to the Pontifical Academy of Sciences in 1936 and named prelate in 1960. By contrast, as late as 1948, astronomers in the Soviet Union were urged to condemn the Big Bang as a reactionary theory that encouraged clericalism, a hostility shared by many scientists and philosophers worldwide until the 1960s.

Besides showing the compatibility of faith and science, the story of Fr Lemaître illustrates the way in which minds and cultures shaped by the belief that God is a Trinity of reason and love have proved fruitful in perceiving order in the universe. Moreover, it is arguable that belief in God who is beyond creation has freed us to theorise about the causation and change of the cosmos as a whole, rather than simply accepting the totality of material reality as an eternal, unchanging given.

"Scientific progress is the discovery of a more and more comprehensive simplicity."

Fr Georges Lemaître

Universal expansion in a modern version of the Big Bang theory

Fr Lemaître predicted in 1927 that the recessional velocity of distant galaxies would increase in proportion to their distance, like the separation of spots on an expanding balloon. Two years later Edwin Hubble confirmed the existence of that law, which has since been validated by space-based telescopes to a high degree of accuracy.

Science and Religion John F. Haught, 1995 Has science made religion intellectually implausible Does it rule out the existence of a personal God In an age of science can we really believe that the universe has a purpose And finally doesn't religion hold much of the blame for the present ecological crisis These questions form the nucleus of today's debate between science and religion This book is a guide for that debate identifying the questions isolating the issues and pointing to ways the questions can be resolved There are four possible ways says John F Haught that we can view the relationship between religion and science First they can stand in complete opposition the conflict position Or we can believe they are so different that conflict is impossible the contrast position A third approach holds that while science and religion are distinct each has important implications for the other A fourth way views them as different but mutually supportive BOOK

MINT für Geisteswissenschaftler Walter Hehl, 2024-04-30 Der Beginn von Naturwissenschaft und Geisteswissenschaft in der Antike war gemeinsam aber die Naturwissenschaft hatte sich bis zum Ende des 19. Jahrhunderts durch ihre Erfolge dominant entwickelt Gegen diese Dominanz prägte der Philosoph Wilhelm Dilthey 1883 den Begriff der Geisteswissenschaften In den Naturwissenschaften war es andererseits klar dass ganze Bereiche des Geistes den Naturwissenschaften nicht zugänglich waren etwa sinnliche Empfindungen und das Bewusstsein Das Buch versucht zu zeigen dass dieser harte Gegensatz weicher geworden ist Die Physik ist geistiger geworden und die Technologie des Geistes hat sich entwickelt Es ist im Grundsatz die Informationstechnologie Mit der Mathematik als Fundament und als Hilfsmittel ergibt dies MINT Ein geistiges Weltbild ohne MINT ist in W rde nicht möglich Es gibt eine Reihe von MINT Bereichen die unmittelbar geisteswissenschaftlich von Nutzen sind Beispiele sind etwa das Prinzip des Lasers und der Begriff der Entropie Ein dritter geistiger Bereich bleibt außerhalb der Kunst Aber Kunst und MINT sind keine Gegensätze
