How Religion Evolved Brian McVeigh, 2017-07-12 Why did many religious leaders Moses Old Testament prophets Zoroaster claim they heard divine voices Why do ancient civilizations exhibit key similarities e g the living dead treating the dead as if they were still alive speaking idols care and feeding of effigies monumental mortuary architecture and houses of gods pyramids ziggurats temples How do we explain strange behaviour such as spirit possession speaking in tongues channelling hypnosis and schizophrenic hallucinations Are these lingering vestiges of an older mentality Brian J McVeigh answers these riddles by updating bicameralism First proposed by the psychologist Julian Jaynes this theory postulates that an earlier mentality existed a human the brain s left hemisphere heard voices of gods or ancestors the brain s right hemisphere Therefore ancient religious texts reporting divine voices were recounting of audio visual hallucinations a method

of social control when early populations expanded As growing political economic complexity destabilized god governed states in the late second millennium BCE divine voices became inadequate Eventually humans had to culturally acquire new cognitive skills modern religions to accommodate increasing social pressures selves replaced the gods and history witnessed an inward turn This psychological interiorization of spiritual experience laid the foundations for the world s great religions and philosophies that arose in India China Greece and the Middle East in the middle of the first millennium BCE

Frames of Reference these do not extend to a wide selection of the world's languages nor do they combine SPACE and TIME in the overarching concept of WORLD which has its own corresponding frames of reference The aim of relating and unifying these concepts and their expression across languages constitutes the unique thrust of the present book which will represent a significant extension of earlier approaches Among its main conclusions will be that the complete separation of terms for SPACE and TIME is a relatively recent cultural phenomenon rather than just a metaphorical extension of the latter from the former The book will be of interest to all students and practitioners of Linguistics in particular Cognitive Linguistics and Linguistic typology but also to a more general readership interested in the historical evolution of concepts of SPACE and TIME

The Bible in Crime Fiction and Drama Caroline Blyth, Alison Jack, 2019-01-24

The Bible has always enjoyed notoriety within the genres of crime fiction and drama numerous authors have explicitly drawn on biblical traditions as thematic foci to explore social anxieties about violence religion and the search for justice and truth The Bible in Crime Fiction and Drama brings together a multi disciplinary scholarship from the fields of biblical interpretation literary criticism criminology and studies in film and television to discuss international texts and media spanning the beginning of the 20th century to the present day The volume concludes with an afterword by crime writer and academic Liam McIvanney These essays explore both explicit and implicit engagements between biblical texts and crime narratives analysing the multiple layers of meaning that such engagements can produce cross referencing Sherlock Holmes with the murder mystery in the Book of Tobit observing biblical violence through the eyes of Christian fundamentalists in Henning Mankell s Before the Frost catching the thread of homily in the serial murders of Se7en or analysing biblical sexual violence in light of television crime procedurals The contributors also raise intriguing questions about the significance of the Bible as a religious and cultural text its association with the culturally pervasive themes of violence im morality and redemption and its relevance as a symbol of the often fraught location that religion occupies within contemporary secular culture
