Explore Investigating Isosceles Triangles

An **isosceles triangle** is a triangle with at least two congruent sides.

The congruent sides are called the **legs** of the triangle.

The angle formed by the legs is the **vertex angle**.

The side opposite the vertex angle is the **base**.

The angles that have the base as a side are the **base angles**.

In this activity, you will construct isosceles triangles and investigate other potential characteristics/properties of these special triangles.

- (A)** Do your work in the space provided. Use a straightedge to draw an angle. Label your angle $\angle A$, as shown in the figure.

- (B)** Using a compass, place the point on the vertex and draw an arc that intersects the sides of the angle. Label the points B and C .
