Trowels in the Trenches Christopher P. Barton, 2021-02-23 Presenting examples from the L. Dewan, Jagdish Bahadur, 2005 fields of critical race studies cultural resource management digital archaeology environmental studies and heritage studies Trowels in the Trenches demonstrates the many different ways archaeology can be used to contest social injustice This volume shows that activism in archaeology does not need to involve radical or explicitly political actions but can be practiced in subtler forms as a means of studying the past informing the present and creating a better future In case studies that range from the Upper Paleolithic period to the modern era and span the globe contributors show how contemporary economic

environmental political and social issues are manifestations of past injustices. These essays find legacies of marginalization in art toys houses and other components of the material world As they illuminate inequalities and forgotten histories these case studies exemplify how even methods such as 3D modeling and database management can be activist when they are used to preserve artifacts and heritage sites and to safeguard knowledge over generations While the archaeologists in this volume focus on different topics and time periods and use many different practices in their research they all seek to expand their work beyond the networks and perspectives of modern capitalism in which the discipline developed These studies support the argument that at its core archaeology is an interdisciplinary research endeavor armed with a broad methodological and theoretical arsenal that should be used to benefit all members of society Contributors Christopher P Barton Stephen A Brighton Tiffany Cain Stacey L Camp Kasey Diserens Morgan Yamoussa Fane Daouda Keita Nathan Klembara Ora V Marek Martinez Christopher N Matthews Bernard K Means Vinod Nautiyal Kyle Somerville Moussa dit Martin Tessougue Kerry F Thompson Joe Watkins Andrew J Webster Encyclopedia of Green Materials Chinnappan Baskar, Seeram Ramakrishna, Angela Daniela La Rosa, 2024-12-26 Encyclopedia of Green Materials covers comprehensive overview recent research and development of Green Materials and Green Nanomaterials and their applications in all areas including electronics sensors textiles biomedical energy and energy storage building constructions and interiors design automotive green plastic manufacturing food packing membrane technology wastewater treatment rubber technology and tire manufacturing The contents focus on sustainable development renewable circular economy Chemistry 4 0 Chemistry through innovation in transforming the world green chemistry and green engineering upcycling and recycling Culinary Herbs: Latest Laboratory, Pre-clinical, and Clinical Studies: Volume 6 Atta-ur-Rahman, M.
