Chancen und Risiken der Industrialisierung in der Versicherungswirtschaft Marco Felten, 2012-04-26 Die Versicherungsbranche ist derzeit einem umfassenden Wandel ausgesetzt. Dieser stellt die Unternehmen vor große Herausforderungen und Veränderungsnotwendigkeiten. Dem daraus resultierenden Wettbewerbs- und Kostendruck müssen die verantwortlichen Entscheidungsträger in den Versicherungsunternehmen erfolgreich begegnen und nach neuen Möglichkeiten suchen, diesen Anforderungen gerecht zu werden. Das Konzept der Industrialisierung wurde umfassend und erfolgreich in der Automobilwirtschaft umgesetzt. Jedoch fehlen theoretische und insbesondere empirische Untersuchungen zur Übertragbarkeit und ganzheitlichen Betrachtung der Industrialisierung in der Versicherungswirtschaft. Marco Felten liefert einen wichtigen Beitrag, um die bestehende Forschungslücke insbesondere durch umfangreiche empirische Untersuchungen zu schließen. Er zeigt ein ganzheitliches Modell zur Umsetzung von Industrialisierung auf sowohl auf Prozess- als auch auf Produktebene und gibt Handlungsempfehlungen für Entscheidungsträger in Versicherungsunternehmen.

Military Heroism in a Post-Heroic Era Uzi Ben-Shalom, René Moelker, Nehemia Stern, Eyal Ben-Ari, 2024-04-11 This book explores the variety of forms that individual heroism and sacrifice can take in the context of contemporary military conflicts. It addresses three key questions: How has an enduring ideal of heroism been transformed by the nature of modern warfare? Are we now witnessing the emergence of new forms of exemplary military behavior? And have new ideals of heroism and by association sacrifice or bravery been added to older forms in the recent past? The book advocates viewing the concept of military heroism as a moral category in which its theoretical definition and empirical practice reflect those factors that are seen as being vital for society itself. The key theoretical and topical challenges addressed in the respective chapters focus on how ideas of heroism become entwined with issues of individualization, bolstered by the cultural assumptions of neo Liberalism, the spread of the human rights discourse, and the judicialization, marketization, and mediatization of armed forces. The book was written by experts on military studies, including many who are currently active military personnel. It includes contributions from a variety of disciplines, e.g. anthropology, sociology, psychology, and political science.

Analyzing the Effect of Sustainability on Supply Chain Relationships Sebastian Brockhaus, 2013-06-13 The notion of sustainability continues to increase in importance for businesses. Today, consumers pay attention to the environmental impacts and social consequences of the products they use. Consequently, an increase in interest in the topic from an industry perspective has been observed, and the topic is considered a megatrend in today's global economy, worthy of additional academic inquiry. This dissertation looks into the role that sustainability plays for companies in the current business environment and its effect on supply chain relationships. This book highlights the effects that introducing sustainability to a supply chain relationship has on the dynamics and structure of these relationships and provides a novel methodological approach to examine the issue. For the

analysis a theoretical framework of current management theories is assembled and the insights of each theory for sustainability in supply chain management are detailed Through a qualitative and a quantitative research phase the findings of this dissertation show that sustainability and collaborative behavior in supply chain relationships positively affect each other This manuscript provides insights for both research and practice Theoretical and managerial implications are detailed and the findings are mirrored with the derived theoretical framework This book therefore helps to promote the effective implementation of sustainability in supply chain management practice and elaborates the theory around the topic
