Fluoride Removal from Groundwater by Adsorption Technology Abdulai Salifu,2017-11-13 In the Eastern corridor of Northern region of Ghana presence of high fluoride concentration in the groundwater has made many drilled boreholes unusable for drinking Little is however known about the factors contributing to the occurrence of high fluoride in this part of Ghana and its spatial distribution Treatment of the fluoride contaminated groundwater by adsorption is also hampered by the lack of suitable adsorbents that are locally available Based on principal component analysis and saturation indices calculations this thesis highlights that the predominant mechanisms controlling the fluoride enrichment probably include calcite precipitation and Na Ca exchange processes both of which deplete Ca from the groundwater and promote the dissolution of fluorite The mechanisms also include F OH anion exchange processes as well as evapotranspiration processes which concentrate the fluoride ions hence increasing its concentration in the groundwater Spatial mapping showed that the high fluoride groundwaters occur predominantly in the Saboba Cheriponi and Yendi districts The thesis further highlights that modifying the surface of indigenous materials by an aluminium coating process is a very promising approach to develop a suitable fluoride adsorbent Aluminum oxide coated media reduced fluoride in water from 5 0 0 2 mg L to 1 5 mg L which is the WHO health based guideline for fluoride in both batch and continuous flow column experiments in the laboratory Kinetic and isotherm studies thermodynamic calculations as well as analytical results from Fourier Transform Infrared Spectroscopy and Raman spectroscopy suggest the mechanism of fluoride adsorption onto aluminium oxide coated media involved both physisorption and chemisorption processes Field testing in a fluoritic community in Northern Ghana showed that the adsorbent is also capable of treating fluoride contaminated groundwater in field conditions suggesting it is a promising defluoridation adsorbent The adsorbent also showed good regenerability potential that would allow re use which could make it practically

and economically viable Additional research is however required to further increase the fluoride adsorption capacity of developed adsorbent

Scientific and Technological Approaches presents in an integrated way the problem of scale deposits precipitation crystallization of sparingly soluble salts in aqueous systems both industrial and biological It covers several fundamental aspects also offering an applications perspective with the ultimate goal of helping the reader better understand the underlying mechanisms of scale formation while also assisting the user reader to solve scale related challenges It is ideal for scientists experts working in academia offering a number of crystal growth topics with an emphasis on mechanistic details prediction modules and inhibition dispersion chemistry amongst others In addition technologists consultants plant managers engineers and designers working in industry will find a field friendly overview of scale related challenges and technological options for their mitigation Provides a unique detailed focus on scale deposits includes the basic science and mechanisms of scale formation Present a field friendly overview of scale related challenges and technological options for their mitigation Correlates chemical structure to performance Provides guidelines for easy assessment of a particular case also including solutions Includes an extensive list of industrial case studies for reference

Molecular Basics of Liquids and Liquid-Based Materials Katsura Nishiyama,Tsuyoshi Yamaguchi,Toshiyuki Takamuku,Norio Yoshida,2022-01-03 This book sheds light on the molecular aspects of liquids and liquid based materials such as organic or inorganic liquids ionic liquids proteins biomaterials and soft materials including gels The reader discovers how the molecular basics of such systems are connected with their properties dynamics and functions Once the use and application of liquids and liquid based materials are understood the book becomes a source of the latest detailed knowledge of their structures dynamics and functions emerging from molecularity The systems discussed in the book have structural dimensions varying from nanometers to millimeters thus the precise estimation of structures and dynamics from experimental theoretical and simulation methods is of crucial importance Outlines of the practical knowledge needed in research and development are helpfully included in the book

Voice & Data ,2004 **Digestive Health Solution** Benjamin I. Brown,2017-04-01 **Fluoride and Fluorocarbon**

Toxicity Nitish Kumar, 2024-11-20 This book presents fluoride and fluorocarbon toxicity with respect to remediation and health issues. It covers sources of fluoride and fluorocarbon contamination, its impact on human health, and prospective remediation by multi-disciplinary approaches with the application of recent advanced technology. This book brings together a diverse group of researchers from different disciplines to address the challenges posed by global mass poisoning caused by fluoride and fluorocarbon contamination. The book sheds light on the global environmental issues and proposes solutions to contamination through multi-disciplinary approaches. The book contains three parts. The first part describes the different sources and distribution of fluoride and fluorocarbon in soil and water. The second part explains the health risks linked to fluoride and fluorocarbon toxicity. The third part addresses sustainable fluoride and fluorocarbon toxicity mitigation strategies and the potential applications of recent biotechnology in providing solutions. This book is a valuable resource to students, academics, researchers, and environmental professionals working in the field of fluoride and fluorocarbon contamination. Flight International, 1996
