Min, Thomas H. Smouse, 1985      **Total Quality Assurance for the Food Industries** WA Gould, 2013-12-01 This revision of Total Quality Assurance brings useful up to date methods used to assure product and process quality of food product and process quality of food products and the changes taking place in the field of quality assurance The book is a practical authority on food quality assurance and the methods are those found in practice today in the food industries It is a valuable text for the student of food science and technology and for the practicing quality assurance technologist The third edition has over 450 page of A to Z technology and practical application of the latest methods and detailed procedure in developing total quality assurance in all food plants including sanitary standards as well as bacteriological procedures The text is divided in to two major parts Part one Fundamentals sets forth the basic principles of total quality assurance for management and the ultimate employee These principles are necessary for the successful operation of a food firm in these times Part two Product evaluation the text describes the various attributes and the characteristics of food plant quality evaluation methods Examples are given for the evaluation of a wide array of food products The methods and procedures described in this text have been applied to most situations for control evaluation and auditing of the quality of foods This is a complete instruction book easily followed yet technically complete for the food technologist by the proven experts in the field of sanitation and quality assurance      **Guidelines for Sensory Analysis in Food Product Development and Quality Control** David H. Lyon, Mariko A. Francombe, Terry A. Hasdell, 2012-12-06 Sensory analysis is not new to the food industry but its application as a basic tool in food product development and quality control has not been given the recognition and acceptance it deserves This we believe is largely due to the lack of understanding about what sensory analysis can offer in product research development and marketing and a fear that the discipline is too scientific to be practical To some extent sensory scientists have perpetuated this fear with a failure to recognize the constraints of industry in implementing sensory testing procedures These guidelines are an attempt to redress the balance Of course product tasting is carried out in every food company it may be the morning tasting session by the managing director competitor comparisons by the marketeers tasting by a product expert giving a quality opinion

comparison of new recipes from the product development kitchen or on line checking during production Most relevant though is that the people responsible for the tasting session should know why the work is being done and fully realize that if it is not done well then the results and conclusions drawn and their implications are likely to be misleading If through the production of these guidelines we have influenced some people sufficiently for them to re evaluate what they are doing and why we believe our efforts have been worthwhile

### **Sensory Evaluation in Quality Control** Alejandra M.

Munoz,2013-11-11 This book addresses an important but so far neglected topic the application of sensory evaluation to quality control Although several articles have been published that have discussed concepts of quality control sensory evaluation QC sensory programs Sensory Evaluation in Quality Control is the first publication that addresses this topic in a comprehensive and practical way This book is comprehensive in that it presents the sensory and statistical information that is needed to design and implement several types of QC sensory programs at the plant level The book is practical in that it provides a step by step description of the complete process to implement such programs and it illustrates this process through real examples encountered by various consumer products companies e g foods personal care products paper products With this practical information sensory and quality professionals can design and implement sound QC sensory programs at the plant level This book was developed to provide the sensory and quality professional with an overview and guide to apply in a production facility the unique techniques that are used to measure sensory responses Therefore the book is intended for QC and or R D personnel e g sensory managers and analysts and quality professionals in charge of implementing an in plant program as well as for the plant management and plant technical personnel sensory coordinator and quality professionals who are ultimately responsible for the routine operation of the established program
