**¡Sálvese quien pueda! / The Robots Are Coming!** Andres Oppenheimer, 2018-10-30 Manteniéndose fiel a su carácter

stico estilo periodístico André Oppenheimer lleva a sus lectores en un nuevo viaje esta vez a través del mundo con la intención de comprender cuál será el futuro de los trabajos de hoy en el día mientras se aproxima lo que muchos han denominado como la era de la automatización. Tal como lo indican dos de los entrevistados de Oppenheimer, ambos expertos en tecnología y economía de la Universidad de Oxford, el cuarenta y siete por ciento de los trabajos existentes corren el riesgo de automatizarse o volverse obsoletos debido a los avances tecnológicos y el crecimiento de los productos y servicios en línea que están por venir en los próximos veinte años. Oppenheimer conversa con expertos en sus campos y examina los cambios que ya comienzan a desarrollarse en varias áreas de empleo incluyendo en la industria de alimentos, en el mundo legal, en la banca y en la medicina. Oppenheimer contrapone también las perspectivas de los tecno optimistas con las de los tecno negativistas e intenta encontrar un término medio entre una visión alarmista del futuro y una que es demasiado crítica. Autodenominado un optimista cauteloso, Oppenheimer opina que la tecnología no necesariamente creará un desempleo masivo sino más bien cambiar drásticamente la definición de lo que hoy conocemos como un empleo.

ENGLISH DESCRIPTION

Staying true to his trademark journalistic approach, André Oppenheimer takes his readers on yet another journey this time across the globe in a thought provoking search to understand what the future holds for today's jobs in the foreseeable age of automation. The Robots Are Coming centers around the issue of jobs and their future in the context of rapid automation and the growth of online products and services. As two of Oppenheimer's interviewees, both experts in technology and economics from Oxford University, indicate, forty seven percent of existing jobs are at risk of becoming automated or rendered obsolete by other technological changes in the next twenty years. Oppenheimer examines current changes in several fields including the food, business, legal, work, banking, and medicine, speaking with experts in the field and citing articles and literature on automation in various areas of the workforce. He contrasts the perspectives of techno optimists with those of techno negativists and generally attempts to find a middle ground between an alarmist vision of the future and one that is too uncritical. A self described cautious optimist, Oppenheimer believes that technology will not create massive unemployment but rather will drastically change what work looks like.
