*International Handbook of Research in History, Philosophy and Science Teaching* Michael R. Matthews,2014-07-03 This inaugural handbook documents the distinctive

research field that utilizes history and philosophy in investigation of theoretical curricular and pedagogical issues in the teaching of science and mathematics. It is contributed to by 130 researchers from 30 countries; it provides a logically structured, fully referenced guide to the ways in which science and mathematics education is informed by the history and philosophy of these disciplines as well as by the philosophy of education more generally. The first handbook to cover the field, it lays down a much needed marker of progress to date and provides a platform for informed and coherent future analysis and research of the subject. The publication comes at a time of heightened worldwide concern over the standard of science and mathematics education, attended by fierce debate over how best to reform curricula and enliven student engagement in the subjects. There is a growing recognition among educators and policy makers that the learning of science must dovetail with learning about science; this handbook is uniquely positioned as a locus for the discussion. The handbook features sections on pedagogical, theoretical, national and biographical research, setting the literature of each tradition in its historical context. It reminds readers at a crucial juncture that there has been a long and rich tradition of historical and philosophical engagements with science and mathematics teaching, and that lessons can be learnt from these engagements for the resolution of current theoretical, curricular and pedagogical questions that face teachers and administrators. Science educators will be grateful for this unique encyclopaedic handbook. Gerald Holton, Physics Department, Harvard University. This handbook gathers the fruits of over thirty years' research by a growing international and cosmopolitan community. Fabio Bevilacqua, Physics Department, University of Pavia.

**Routledge Handbook of Technological Advances in Researching Language Learning** Karim Sadeghi, 2024-11-29. The Routledge Handbook of Technological Advances in Researching Language Learning is the first volume to bring together the extant scholarship on the nature and role of digital technology in conducting second language research. The Handbook showcases technological advances, including issues and considerations affecting research conduction in second language education. The contributions focus on the role of digital technology in researching second language education, second language acquisition and applied linguistics. Contributions by both seasoned and junior scholars feature empirical studies and methodological and/or theoretical discussions of technological tools used or tools that can be used for conducting research into various aspects of second language learning and acquisition. This book will primarily appeal to academic specialists, practitioners and professionals in the field of applied linguistics and second language education. The book will also be informative for scholars and professionals in disciplines such as educational technology and TESOL.

**Deleuze's Kantian Ethos** Carr Cheri Lynne Carr, 2018-05-15. Among the philosophical traditions that seem most at odds with Gilles Deleuze's project, two stand out: Kantianism and normative ethics. Both of these traditions represent forms of moralism that Deleuze explicitly rejects. In this book, Cheri Lynne Carr explores the very real potential of Deleuze's clandestine use of Kantian critique for developing a new ethical practice. This new practice is built on an idea implicit in much of Deleuzian thought: the idea of critique as a way of life. This new concept of a

critical ethos is a powerful form of moral pedagogy directed at developing in us the wisdom to perceive unanticipated features of moral salience evaluate our presupposed principles affirm the limits imposed by those presuppositions and create concepts that capture new ways of thinking about moral problems
