 Brundtland Report sustainable development has become key to the management systems within businesses and a means by
 which companies can increase their long term value Being a sustainable company increasingly means staying alive in
 business and has become a necessity for all kinds of enterprises from the micro sized to global corporations In more recent
 years many companies and indeed governments have looked at sustainability as a means to combat the multiple challenges of
 environmental accidents global warming resource depletion energy poverty and pollution However being sustainable or
 maintaining sustainability is not an easy task for a company's management function It needs continuous support and
 engagement from the board the executive management staff and other stakeholders alike Additionally it brings extra costs to
 the company in terms of hiring trained staff organising continuous training in the company publishing sustainability reports
 and subscribing to a rating system Sustainability must be nourished by a company's board as well as by all of its departments
 such as accounting marketing and human resources By the same token it is not enough for a company simply to declare itself
 a sustainable business or rely on past measures and reputation sustainability is an ongoing activity and one which has to be
 proved by periodically disclosing sustainability reports according to international rating systems In *Sustainability and
 Management An International Perspective* Kıymet Çalıyurt and Ülkü Yüksel bring together international authors from a variety of
 specialisations to discuss the development aspects problems roadmap trends and disclosure systems for sustainability in
 management The result is a lively insightful exposition of the field *Corporate Social Responsibility and Entrepreneurship
