Paul and the Salvation of the Individual Gary W. Burnett, 2001-12-01 This book proposes that there was a lively sense of the individual self in persons in the Hellenistic world of the urban centres in which Paul lived and ministered whereby individualistic behaviour was not unknown and where individuals were not simply determined by their culture and the group of which they were a part This is in contrast to many recent sociological approaches to the New Testament which emphasise the collective over the individual Hence it is argued that the individual is a central feature of Paul's letter to the Romans Three texts in the first eight chapters of Romans are examined to indicate Paul's concern with the salvation of the individual and not just with questions of a more collective nature to do with the identity of the people of God This book challenges the very strong emphasis put upon the collective in recent approaches to Paul's letter to the Romans especially by sociologically based NT research but also within the wider body of Romans research It suggests that it is possible to maintain that Paul was vitally interested in the salvation of the individual without having to revert to traditional Lutheran interpretations of the text

Interpreting the Evolution of Atayal Tribal Textile Patterns Po Hsun Wang, Jie Li, 2025-07-02 This book elucidates findings from an anthropological study that analyzes the patterns of Taiwan's Atayal tribe's fabric in their ethnic dress codes By analyzing the changes and development of the patterns over time the authors draw fascinating conclusions regarding the geographical migration and intermarriage practices between indigenous minority groups in Taiwan's history The book brings new insights within East Asian linguistic anthropology in theorizing about the origins of legends and broader patterns of ethnic migration integrating the characteristics and relationships among Atayal fabrics and interpreting these relationships in connection with the flow of sub ethnic groups In doing so the book provides rich empirical evidence for anthropologists and migration scholars to better understand the movement of ethnic groups in Taiwan while also establishing a model for how studying textile design can be employed to establish such linkages The book shows that the composition and changes of ethnic minority patterns have their own internal logic and causes By studying this the authors demonstrate how such work might translate intangible and tangible culture into explicit and shareable knowledge and provide a compass for other anthropologists and researchers in the fields of visual and linguistic anthropology migration studies and ethnic and indigenous cultures in Asia and beyond

Exploring Cultural Dynamics and Tensions Within Service-Learning Trae Stewart, Nicole Webster, 2011-09-01 Service learning is an exciting pedagogy and field of study offering insight into how academic study and community engagement blend to create social change In its most traditional conceptualization servicelearning activities typically manifest within communities where outside individuals address a need Service learning is purported to have a transforming effect on individual student perspectives by providing students the opportunity to interact with people and enter into situations that allow students to test their predisposition towards others However the literature on the impact of service learning on participants acceptance of diversity and development of open mindedness reports mixed outcomes The purpose of this book is to explore cultural tensions and dynamics within the field of service learning It is not meant to be an exhaustive review of the interplay between culture and service learning but rather a starting point for an ongoing conversation about how this complex topic impacts the field In 18 chapters educators students and administrators investigate the cultural values of service learning itself and the tensions created when this is at odds with the values of others within K 12 and higher education in the United States and abroad Authors include community organization representatives researchers directors of offices of community engagement university administrators junior and senior faculty and former service learning undergraduate students Submissions reflect a range of genres including theoretical conceptual pieces position papers case studies and other traditional academic essays challenging how students and community members are affected by the cultural tensions within service learning engagement

Alter, 2021-05-11 Yoga has come to be an icon of Indian culture and civilization and it is widely regarded as being timeless and unchanging Based on extensive ethnographic research and an analysis of both ancient and modern texts Yoga in Modern India challenges this popular view by examining the history of yoga focusing on its emergence in modern India and its dramatically changing form and significance in the twentieth century Joseph Alter argues that yoga s transformation into a popular activity idolized for its health value is based on modern ideas about science and medicine Alter centers his analysis on an interpretation of the seminal work of Swami Kuvalayananda one of the chief architects of the Yoga Renaissance in the early twentieth century From this point of orientation he explores current interpretations of yoga and considers how practitioners of yogic medicine and fitness combine the ideas of biology physiology and anatomy with those of metaphysics transcendence and magical power The first serious ethnographic history of modern yoga in India this fluently written book is must reading not only for students and scholars but also practitioners who seek a deeper understanding of how yoga developed over time into the exceedingly popular phenomenon it is today
