The Discovery of Cosmic Voids Laird A. Thompson, 2020-12-10 The large-scale structure of the Universe is dominated by vast voids with galaxies clustered in knots sheets and filaments forming a great cosmic web In this

personal account of the major astronomical developments leading to this discovery we learn from Laird A Thompson a key protagonist how the first 3D maps of galaxies were created Using non mathematical language he introduces the standard model of cosmology before explaining how and why ideas about cosmic voids evolved referencing the original maps reproduced here His account tells of the competing teams of observers racing to publish their results the theorists trying to build or update their models to explain them and the subsequent large scale survey efforts that continue to the present day This is a well documented account of the birth of a major pillar of modern cosmology and a useful case study of the trials surrounding how this scientific discovery became accepted

A Poet in the Bardo Shyamal Bhattacharjee, 2023-11-29 Shyamal Bhattacharjee's second English novel *A Poet in the Bardo* tells the story of a man who is dying in an accident. In those moments of death, the man sees his whole life in some flashes wherein human concepts of space and time have no bearing. Even all the events that could have happened but did not happen in life become some miraculous visual experiences and lead him to overcome various bonds and obstacles towards a peaceful death. As the movement of a newly deceased soul towards a desired rebirth or void is described within the pattern of Tibetan Bardo Thodol or Book of the Dead, this novel also describes an equivalent experience. The amazing epicness of the language of that description belongs to Shyamal Bhattacharjee's own poetic style.

The Chu Silk Manuscripts from Zidanku, Changsha (Hunan Province) Volume II Li Ling, 2025-01-22 This book is the second in a two-volume monograph on the Zidanku Silk Manuscripts looted in 1942 from the Warring States period Chu tomb at Zidanku, Changsha. The manuscripts date to the turn from the 4th to the 3rd centuries BCE and are the only pre-Imperial Chinese manuscripts on silk found to date. The monograph represents the culmination of almost four decades of research by Professor Li Ling of Peking University. Volume One addresses the circumstances of the discovery of the Zidanku Silk Manuscripts and the subsequent provenance history in China and the United States. Volume Two provides the first complete transcription of the Zidanku Silk Manuscripts in their entirety together with reproductions of the original manuscripts. The transcription is accompanied by comprehensive annotations with full paleographic and philological analysis of the texts. An English translation of the texts has been added by Professor Donald Harper. For the first time, the Zidanku Silk Manuscripts can be read as a single corpus constituting a unique source of information that complements and goes beyond what is known from transmitted texts. The Zidanku Silk Manuscripts reveal a range of cosmological and religious ideas and shed new light on the formation of correlative thought in the Warring States period. This volume represents the continuation of the important study that Professor Li Ling devoted to the history of the discovery of the Chu manuscripts from Zidanku. It includes the photographic reproduction, transcription, and detailed study of three manuscripts and several fragments identified thanks to the efforts spanning more than four decades by the greatest expert on hemerological texts of the Warring States period, Marianne Bujard. Professor Cole Pratiq des Hautes tudes Paris. This beautifully produced volume with full color plates of all the manuscript fragments does vivid justice to the meticulous painstaking and rigorous decades of masterful work that Li Ling, the world's foremost authority on the subject, has poured into the reconstruction, decipherment, and interpretation of these important textual artifacts, much of which is brought to light here for the first time. Scott Cook, Tan Chin Tuan Professor of Chinese Studies, National University of Singapore. The collaboration of the two most eminent experts of Chinese paleography, Li Ling in Beijing and Donald Harper in Chicago, is again a felicitous demonstration of what Sino-American cooperation can achieve. Lothar Ledderose, Senior Professor, Institute of East Asian Art History, Heidelberg University. This volume compiles and assesses with immaculate accuracy and critical acumen all extant relevant material that Li Ling uncovered during his

over forty year pursuit for answers in and out of China among archaeologists historians paleographers and conservation scientists a true model of interdisciplinary and international research and an inspiration to all scholars in early China studies Jenny F So Senior Curator for Early Chinese Art 1990 2000 National Museums of Asian Art Smithsonian Institution Professor Li Ling s splendid book offers to the Western public the first ever comprehensive monograph on the Chu Silk Manuscripts from Zidanku This masterful research to which he has devoted more than forty years is not only a minute investigation the most extensive of its kind on the famous manuscripts but also a very valuable contribution to our understanding of the intellectual life of the Late Warring States period Alain Thote Emeritus Professor cole Pratique des Hautes tudes Paris Complemented by high quality color pictures old photographs hand facsimiles of the manuscripts as well as an updated bibliography and a comprehensive index of the ancient graphs this English edition should undoubtedly be regarded as the new reference edition for these excavated texts Olivier Venture Professor cole Pratique des Hautes tudes Paris Alba Longa Riccardo Bellucci,2019 Where was Alba Longa Over the centuries this question has stimulated the most varied conjectures by scholars poets historians philologists and of course archaeologists Fantasy has often merged with reality myth with history All of these hypotheses present some credible data but mixed with more improbable aspects drawn from either ancient writers or uncorroborated documents This in turn has led to incompatibilities between the hypotheses and the reality of archaeological excavations The scholar Riccardo Bellucci after years of systematic research now proposes a coherent and consistent solution to the location of the Mater Urbis in a previously unsuspected area The motivation intuition and documentation that has led Bellucci to decide on his theory will fascinate everyone and stimulate debate on the truth of his conclusions The book then goes beyond the story of Alba Longa itself to provide further fascinating detail related to the area From Astronautics to Cosmonautics Mike Gruntman,2007 Two pioneers of space exploration Robert Esnault Pelterie and Ary Sternfeld introduced the words astronautics and cosmonautics respectively into the scientific language The origin of the term astronautics is well documented In contrast the history of the word cosmonautics remains poorly known Ary Sternfeld is also largely forgotten The fiftieth anniversary of the breakthrough to space celebrated in 2007 makes it especially appropriate to remember those visionaries who paved the way to cosmos The book tells the stories of astronautics and cosmonautics and describes a most unusual life journey of Ary Sternfeld
