

- IT professionals who want to take the Microsoft Certification exam 70-533, Implementing Azure Infrastructure Solutions

Audience Prerequisites

In addition to their professional experience, students who attend this training should already have the following technical knowledge:

- Completed the Microsoft Certified Systems Administrator (MCSA) certification in Windows Server 2012.
- Understanding of on-premises virtualization technologies, including: virtual machines, virtual networking, and virtual hard disks (VHDs).
- Understanding of network configuration, including: TCP/IP, Domain Name System (DNS), virtual private networks (VPNs), firewalls, and encryption technologies.
- Understanding of websites, including: how to create, configure, monitor and deploy a website on Internet Information Services (IIS).
- Understanding of Active Directory concepts, including: domains, forests, domain controllers, replication, Kerberos protocol, and Lightweight Directory Access Protocol (LDAP).
- Understanding of database concepts, including: tables, queries, Structured Query Language (SQL), and database schemas.
- Understanding of resilience and disaster recovery, including backup and restore operations

At Course Completion

After completing this course, students will be able to:

- Describe Azure architecture components, including infrastructure, tools, and portals.
- Implement and manage virtual networking within Azure and connect to on-premises environments.
- Plan and create Azure virtual machines.
- Configure, manage, and monitor Azure virtual machines to optimize availability and reliability.
- Deploy and configure web apps and mobile apps.
- Implement, manage, backup, and monitor storage solutions.
- Plan and implement data services based on SQL Database to support applications.
- Deploy, configure, monitor, and diagnose cloud services.
- Create and manage Azure AD tenants, and configure application integration with Azure AD.
- Integrate on-premises Windows AD with Azure AD.
- Automate operations in Azure management by using automation.

book is for IT architects system and network admins and DevOps engineers who are aware of Azure solutions and want to implement them for their organization

What You Will Learn

- Implement virtual networks network gateways Site to Site VPN ExpressRoute routing and network devices
- Understand the working of different storage accounts in Azure
- Plan deploy and secure virtual machines
- Deploy and manage Azure Containers
- Get familiar with some common Azure usage scenarios

In Detail

Microsoft Azure has numerous effective solutions that shape the future of any business. However the major challenge that architects and administrators face are implementing these solutions appropriately. Our book focuses on various implementation scenarios that will help overcome the challenge of implementing Azure's solutions in a very efficient manner and will also help you to prepare for Microsoft Architect exam. You will not only learn how to secure a newly deployed Azure Active Directory but also get to know how Azure Active Directory Synchronization could be implemented. To maintain an isolated and secure environment so that you can run your virtual machines and applications you will implement Azure networking services. Also to manage access and secure your confidential data you will implement storage solutions. Toward the end you will explore tips and tricks to secure your environment. By the end you will be able to implement Azure solutions such as networking storage and cloud effectively.

Style and approach

This step by step guide focuses on implementing various Azure solutions for your organization. The motive is to provide a comprehensive exposure and ensure they can implement these solutions with ease.
