**Essential Competencies for English-medium University Teaching** Ruth Breeze, Carmen Sancho Guinda, 2016-10-06

As English gains prominence as the language of higher education across the world many institutions and lecturers are becoming increasingly concerned with the implications of this trend for the quality of university teaching and learning. With an innovative approach in both theme and scope this book addresses four major competencies that are essential to ensure the effectiveness of English medium higher education: creativity, critical thinking, autonomy and motivation. It offers an integrated perspective both theoretical and practical which defines these competences from different angles within ELT and Applied Linguistics while also exploring their points of contact and applications to classroom routines. This approach is intended to provide practical guidance and inspiration in the form of pedagogical proposals, examples of teaching practice and cutting edge research by scholars and university teachers from all over the world. To that end a leading specialist in the field introduces each of the four competencies explaining concepts accessibly and synthetically, exposing false myths, presenting an updated state of the art and opening windows for future studies. These introductions are followed by practitioner chapters written by teachers and scholars from different cultures and university contexts who reflect on their experience and/or research and share effective procedures and suggestions for the university class with English as a vehicle for instruction.

The Religious Studies Skills Book Eugene V. Gallagher, Joanne Maguire, 2018-12-13 Studying religion in college or university. This book shows you how to perform well on your course tests and examinations, write successful papers and participate meaningfully in class discussions. You'll learn new skills and also enhance existing ones which you can put into practice with in-text exercises and assignments. Written by two award-winning instructors, this book identifies the close reading of texts, material culture and religious actions as the fundamental skill for the study of religion at undergraduate level. It shows how critical analytical thinking about religious actions and ideas is founded on careful, patient yet creative reading of religious stories, rituals, objects and spaces. The book leads you through the description, analysis and interpretation of examples from multiple historical periods, cultures and religious traditions, including primary source material such as Matthew 6:9-13, the Lord's Prayer, the Gohonzon scroll of the Japanese new religion Soka Gakkai and the pilgrimage to Mecca (hajj). It provides you with typical assignments you will encounter in your studies, showing you how you might approach tasks such as reflective, interpretive or summary essays. Further resources found on the book's website include bibliographies and links to useful podcasts.

The Art and Science of Intelligence Analysis Julian Richards, 2010-05-27 Written for trainers and analysts in British policing and security services, this book takes a practical look at intelligence analysis by synthesising the key issues and providing context. With case studies and scenario-based exercises, the author presents practical recommendations for training and analysis.

*Empathetic Policy Design* Piyapong Boosabong, 2025-01-17 This book sets out

to develop a policy design process that is more inclusive by creating space for emotions and feelings Rather than focus solely on expert knowledge it places the fears and hopes of citizens at the heart of policy design to facilitate meaningful interactions between policymakers and the citizens they serve Focusing particularly on evidence from Thailand but drawing on case studies from around the world the book argues that empathetic policy design is crucial to foster social learning and better informed policies It also focuses on how emotions can be incorporated into policy design and how policymakers of the future might use these design processes to create and implement policies that will benefit all The book will appeal to all those interested in public policy and policy design

**Handbook of Research on Advancing Critical Thinking in Higher Education** Wisdom, Sherrie, Leavitt, Lynda, 2015-07-17 The importance of critical thinking has surged as academics in higher education realize that many students upon entering college lack the critical thinking skills necessary to succeed While much has been written regarding the lack of critical thinking less has been written on the success of methods implemented to develop this fundamental skill The Handbook of Research on Advancing Critical Thinking in Higher Education explores the effective methods and tools being used to integrate the development of critical thinking skills in both undergraduate and graduate studies Due to the difficulties associated with teaching critical thinking skills to learners of any age this publication is a crucial addition to the scholarly reference works available to pre service and early career teachers seasoned educational professionals professors across disciplines curriculum specialists and educational administrators

*Higher Order Thinking Skills in the Language Classroom: A Concise Guide* Afsaneh Ghanizadeh, Ali H. Al-Hoorie, Safoura Jahedizadeh, 2020-09-11 In this book we try to provide a practical down to earth guide for those who are involved in language learning and teaching We hope that this book will be a useful reading for those who would like to incorporate higher order thinking skills HOTS enhancing techniques in their teaching practice We set out from the position that although it is hardly doubtful that it is at the heart of education critical thinking is in reality often not given its due attention in pedagogy particularly in language education This book offers readers some practical advice on how to implement HOTS in their own practice It has been written to take the

reader through each technique with the ultimate goal of promoting HOTS step by step In the introductory chapter we present an overview of the theory behind HOTS its definition its relation to Bloom s Taxonomy its two dimensions critical thinking and reflective thinking and the ideas of some influential thinkers in this area The subsequent chapters present six HOTS enhancing techniques that classroom teachers can draw from namely graphic organizers critical discourse analysis argumentation emotion regulation and emotional intelligence enhancing techniques reflective journals and mindfulness based strategies As the book draws on a wide ranging review of literature with exercises for direct use with language learners we hope that this provides both theoretical and practical support for the teaching process to help language learners become effective critical thinkers The compilation of the ideas in this book took us a long time over a decade Something that takes such a long time requires much engagement and life experience so did this book      **Classroom Connections, Grade**
