practical design solutions *Railway Information Modeling RIM* Mounir Bensalah, Abdelmajid Elouadi, Hassan Mharzi, 2019-08-09 Building Information Modeling BIM is the digital and graphical representation of the physical and functional characteristics of a structure. It provides a reliable basis for decisions throughout a building's lifecycle and with BIM it is possible to design, plan, build and track projects. In particular, BIM has sparked a transformation of the railway sector. *Railway Information Modeling RIM* is a compilation of two years' worth of academic, conceptual and practical research on the integration of BIM into railway. It summarizes and focuses on a survey carried out by the authors who are experts in the field. The book also contains a literature review and a case study to demonstrate the benefits and sustainability of BIM integration and finishes with the practical steps and considerations for the successful management of the integration process. *ICGG 2022 - Proceedings of the 20th International Conference on Geometry and Graphics* Liang-Yee Cheng, 2022-08-12 This book covers recent achievements on the ever-expanding field of Geometry and Graphics on both analogical and digital fronts from theoretical investigations to a broad range of applications, new teaching methodologies and historical aspects.
