Willingham, Nancy S. Cole, 2013-12-16 There have been many important changes in the participation of women and men in American society over the past quarter century Tests play a role in those changes by providing evidence of the diverse achievement and proficiency of women and men They aid the learning process and reflect inequalities in opportunity to learn and participate In addition they provide useful information in considering what alternatives in education and work make most sense for individuals and influence views about groups of students educational programs and a wide range of issues For all of these reasons it is important that tests assess fairly and reflect accurately the ways young people are and are not achieving as well as desired The test performance of women and men is a research topic of historical interest and has received much attention in recent years Because of this increased interest there is a great deal of new research and data available The

purpose of the study presented in this volume was to review this new information with two objectives in mind to clarify patterns of gender difference and similarity in test performance and related achievements and to see what implications those findings might have for fair assessment and as a corollary examine the assessment process as a possible source of gender differences This study is interested in tests used in education to assess developed knowledge and skill In order to gain a broader view of gender similarity and difference the contributors looked at other types of measures and other characteristics of young women and men Their hope is to contribute to a firmer basis for insuring fairness in tests an objective which is particularly important as the field moves increasingly to new forms of assessment in which there is less experience

Educational Assessment Robert J. Wright, 2008 Educational Tests and Measurements in the Age of Accountability is a core text for use in a first level graduate course in educational measurement and testing In addition to covering the topics traditionally found in core textbooks for this course this text also provides coverage of contemporary topics including national testing programs international achievement comparisons the value added assessment of schools and teachers and the public policy debate on selective admissions vs affirmative minority enrollment

Literate Lives Amy Seely Flint, 2007-11-09 Literate Lives Teaching Reading and Writing in Elementary Classrooms invites readers to consider the complexities of the reading process in diverse settings The text is designed to meet the challenges and needs of undergraduate and graduate teacher candidates in elementary education programs helping them to have a better first year in the classroom experience The text introduces teacher candidates to the notion that reading is a complex multi layered process that begins early in a child s life Reading by all accounts is more than decoding symbols on a page While this is one component of the reading process it is important for teacher candidates to see a broader more complete picture of reading Given the role that reading plays in the elementary school curriculum it is imperative that teachers have a well developed understanding of the reading process and what it means to be a teacher of readers Literate Lives Teaching Reading and Writing in the Elementary Classroom covers the major theories and application strategies of the reading process as well as current debates in the field using a unique framework that builds upon the following themes believing that literacy is based in social cultural and historical contexts assuming an inquiry stance being problem posers and wondering why using kidwatching Goodman 1985 as an assessment tool to make informed instructional decisions recognizing and using the multiple literacies that children bring to the classroom lingering and reflecting on one s decisions in light of what one knows and believes
