In the upper left part of this report, scores are printed for the tests, totals, and, if available, the composite. General types of scores are reported, including the national percentile rank (NPT), which is the percent of students in this grade in the nation with a lower score on that test, total, or composite.

The graph of NPT to the right of the scores provides a visual display of the student's performance on each test relative to the other tests. The horizontal bands help to show that each score is affected by a certain amount of error. Depending on the area taken, the shaded region on the graph represents the width of the band for the Core Total, the Composite, or the Survey Total, the score that best describes the student's overall achievement across tests. Bands that lie completely outside the shaded region indicate scores that are probably higher or lower than the score. Bands for various test scores also can be compared with one another. Those that overlap each other represent test performances that are probably fairly similar. When two bands do not overlap, those scores indicate performances that are probably different.

The lower part of the report provides detailed information about skills in each test area. The number of items for each skill, the number attempted, the percent correct for the student, and the percent correct for students in this grade in the nation are reported. The percentile rank of the percent correct score for the student is also displayed as a horizontal bar. The varying lengths of these bars permit identification of the student's stronger and weaker areas of achievement.
