Renzo Piano Building Workshop Peter Buchanan, Renzo Piano, 1997 Overview of Italian architecture 1937 **Renzo Piano Building Workshop - Volume 4** Peter Buchanan, Renzo Piano, 1993 As Peter Buchanan has shown in the first three volumes of Renzo Piano's 1937 complete works Piano follows no fashions of form or theory nor is he limited to a personal idiom. Instead he concerns himself with the specifics and potential of a particular situation and moment meeting the challenges of the programme pushing the limits of technology but always responding sensitively to the topography or urban fabric of the building's site. This fourth volume on Renzo Piano provides an illuminating study of the architect's working method in particular his regard for context followed by a presentation of his projects from 1989 to 2000. These range from urban works such as the Potsdamer Platz masterplan in Berlin a science museum in Amsterdam and high rise towers in Rotterdam and Sydney to the acclaimed Beyeler Foundation and the Jean Marie Tjibaou Cultural Centre in New Caledonia which exemplifies the architect's sensitivity to site and local tradition combining traditional materials and techniques with those from the cutting edge of technology. *Renzo Piano Building Workshop - Volume 3* Peter Buchanan, 1993 Overview of Italian architecture 1937 **A Critical History of Contemporary Architecture** Elie G. Haddad, David Rifkind, 2016-12-05 1960 following as it did the last CIAM meeting signalled a turning point for the Modern Movement. From then on architecture was influenced by seminal texts by Aldo Rossi and Robert Venturi and gave rise to the first revisionary movement following Modernism. Bringing together leading experts in the field this book provides a comprehensive critical overview of the developments in architecture from 1960 to 2010. It consists of two parts the first section providing a presentation of major movements in architecture after 1960 and the second a geographic survey that covers a wide range of territories around the world. This book not only reflects the different perspectives of its various authors but also charts a middle course between the aesthetic histories that examine architecture solely in terms of its formal aspects and the more ideological histories that subject it to a critique that often skirts the discussion of its formal aspects. The Architecture of Full-Scale Mock-Ups Nick Gelpi, 2020-02-26 The Architecture of Full Scale Mock Ups looks at the theory and contemporary practice of creating full scale architectural mock ups. This book serves as an introduction to the various forms of full scale mock ups which occur today. To broaden the definition of mock ups Nick Gelpi dives deep into the use of mock ups in seven high profile and global contemporary case studies. Instead of the presentation drawings and final building photos the documentation of case studies relies on process photos interviews and moments of tension in the execution of each building. With never before published content case studies include buildings from all over the world including the Quincho Tia Coral and Teleton Building Copper House II the Perez Art Museum Miami the Cit de l'Océan et du Surf Museum and more. Investigating unique case studies to answer how and when full scale mock ups occur today this book is ideal for professionals and students of architecture studying materials and representation design build and professional practice **Fassaden Atlas** Thomas Herzog, Roland

Building Stones of Milan and Lombardy Roberto Bugini, Luisa Folli, 2023-04-17 Milan has played an important role in the Italian country since the Roman period This importance is reflected also by the diffusion of stone architecture a persisting trait of Milan architecture was the use of different stones in the same building Milan lies in the middle of the alluvial plain of the Po far from the stone quarries some waterways were dug out in order to supply the building stones from the surrounding territories The study of stone as a building material was significant at the end of 19th century but then it was largely neglected by both architects and geologists So it is significant to suggest a study about the stones employed to build in Milan Volume 1 in relationship with a petrographic study about the features of the stones quarried in the whole Lombard territory Volume 2 The present volume contains a record of Milanese edifices marking the different historical periods Each edifice is described in a card containing the building history the architect the kind of stone employed and subdivided according to the different parts of the building and the shape of stone elements A particular
