

The background of the book cover is a close-up, high-contrast photograph of an hourglass. The dark, reflective glass of the hourglass forms a large, inverted triangle in the center, with the white sand filling the remaining space. The lighting creates sharp highlights and deep shadows on the glass surfaces.

Charnovitz, 2002 This book addresses the linkages between freer trade and other societal objectives The chapters are previously published articles on some of the most controversial issues in trade policy today The topics include 1 the core concepts of trade linkage 2 trade and environmental policy 3 trade employment and labour standards 4 trade and human

rights and 5 the role of nongovernmental organizations NGOs in the World Trade Organization WTO The main theme of the book is that trade law should not be isolated from other realms of international law Trade is vital to economic and human development but trade restrictions are sometimes needed to preserve ecosystems and to achieve other social goals from the Preface

Correlated neuronal activity and its relationship to coding, dynamics and network architecture Tatjana Tchumatchenko, Ruben Moreno-Bote, 2014-12-03 Correlated activity in populations of neurons has been observed in many brain regions and plays a central role in cortical coding attention and network dynamics Accurately quantifying neuronal correlations presents several difficulties For example despite recent advances in multicellular recording techniques the number of neurons from which spiking activity can be simultaneously recorded remains orders magnitude smaller than the size of local networks In addition there is a lack of consensus on the distribution of pairwise spike cross correlations obtained in extracellular multi unit recordings These challenges highlight the need for theoretical and computational approaches to understand how correlations emerge and to decipher their functional role in the brain
