Eigenkapitalregulierung bei Versicherungsunternehmen Thomas Hartung, 2007-03-14 Die rechtlichen Rahmenbedingungen für Versicherungsunternehmen unterliegen in der Europäischen Union einem nachhaltigen Veränderungsprozess. Wurde im Kreditwesensektor schon seit längerem kontrovers über die ideale Konzeption der Mindestanforderungen an das haftende Eigenkapital diskutiert, so rückt durch das Projekt Solvency II nun auch in der Assekuranz die Regulierung des Eigenkapitals stärker in das unternehmerische Blickfeld. Dr. Thomas Hartung untersucht in seiner Habilitationsschrift die derzeitige Leistungsfähigkeit der Risikomodellierung für die Eigenkapitalregulierung von Versicherungsunternehmen. Er reflektiert hierzu nicht nur den aktuellen Forschungsstand zur solvabilitätsorientierten Risikoquantifizierung, sondern auch die Möglichkeiten zur Quantifizierung der Abhängigkeitsstrukturen zwischen den Risiken. Vor diesem Hintergrund gelingt es ihm, die bislang in der Aufsichtspraxis vorzufindenden Solvabilitätskonzeptionen kritisch zu vergleichen und hinsichtlich ihrer Eignung zur Verwirklichung der Ziele der Eigenkapitalregulierung ökonomisch zu bewerten.

Managing Services Alan Nankervis, Yuki Miyamoto, Ruth Taylor, John Milton-Smith, 2005-10-27 The rapid increase in global services during the last few decades is without doubt one of the most challenging social, cultural, political and especially economic forces of our time. Services have supplanted agriculture, manufacturing and resources as the primary source of international competitive advantage in many countries, providing wealth, employment and almost unlimited future opportunities for growth, whether in traditional or more innovative forms. This book explores the strategic management of services through an Integrated Services Management Model, which links operational, marketing, financial and human resource management functions within a broad and diverse collection of international, regional and local service contexts. It contains numerous case examples, student projects and exercises designed to illustrate common problems and innovative approaches, with a particular focus on the Asia Pacific and Australasian regions.

[An Alternative Approach to Liquidity Risk Management of Islamic Banks](#) Muhammed Habib Dolgun, Abbas Mirakhor, 2021-01-18 Despite noticeable growth in Islamic banking and finance literature in recent years, very few published books in this area deal with supervisory and regulatory issues in Islamic banking, theoretically or empirically, and none with the critical issue of risks involved in liquidity management of Islamic banks. This unique book is the first of its kind in dealing with challenges these financial institutions face in the absence of an interest rate mechanism and debt-based financial instruments. The book examines critically issues involved in managing the risk of liquidity management for these types of institutions, including those stemming from Basel requirements. It then offers an alternative regulatory framework more appropriately suited for such banks without compromising safety and security. The book's unique features and innovative dimensions diagnostically differentiate between Islamic banks and conventional banks as related to liquidity management risks. It proposes a risk-sharing regulatory framework that, once implemented, would mitigate risks posed by balance sheet mismatches. The book aims to assist

regulators supervisors Islamic finance practitioners academicians and other relevant stakeholders **Behind the Swap**
Andrew DeJoy,2022-05-10 Andrew DeJoy's Behind the Swap examines the risks involved in post trade processing in swaps and derivative markets and provides solutions to better control those risks While Andrew doesn't claim to have all the answers he does believe there is a way to create a safer stronger and better financial system for all stakeholders In August of 2020 Citibank made one of the worst mistakes in banking history it accidentally sent out almost 900 million of its own funds Many of the recipients didn't give back the money Citibank sued And a federal court ruled that the recipients could keep the funds Citibank's error is not surprising The underlying contributors that led to the mistaken payment permeate the global financial services industry Manual data entry decades old technological infrastructure inadequate training and systems that can't interact with one another are just a few of the problems that face post trade processing the machinery behind financial markets Unfortunately years of neglect by regulators and financial institutions themselves has left this infrastructure needlessly complex astoundingly inefficient frequently inaccurate and woefully inadequate for modern financial markets Behind the Swap helps explain what's driving the recent series of banking blunders like Barclay's 678 million clerical error and Citibank's fat finger Flash Crash that caused an 8% decline in the Swedish stock market The book also touches on concepts that readily connect to Credit Suisse's 5.5 billion loss on its trades with Archegos The problems are easy to see but difficult to admit For financial institutions the current system costs billions of dollars each year in labor systems maintenance and lost funds For regulators the current system precludes the ability to track systemic risk It also artificially inflates the stability of the global financial system For lawyers and prosecutors the current system allows ample opportunity for unlawful misconduct such as rogue trading and fraud **Download Banking Current Affairs October 2021 - Free PDF!**

operations and the board's monthly or quarterly review and evaluation remains an unresolved challenge. Expertise in the area of risk management is a fundamental requirement for effective corporate governance if not by all certainly by some board members. This means that along with board committees such as compensation audit strategy and several others risk management committees must be established to monitor the likelihood of certain events that may cause the collapse of the firm. Risk Management and Corporate Governance allows academics and practitioners to assess the state of international research in risk management and corporate governance. The chapters overlay the areas of risk management and corporate governance on both financial and operating decisions of a firm while treating legal and political environments as externalities to decisions undertaken.

Management Of Banking And Financial Services, 2/E Suresh Padmalatha, 2011-09 The dynamic banking and financial services environment in the country calls for prudent decision making under pressure. Management of Banking and Financial Services provides students and practitioners with a thorough understanding of managerial issues in the banking and financial services industry enabling them to evaluate the overall organisational impact of their decisions. The first section of the book focuses on the basic concepts of banking and financial services and the other sections explain how these concepts are applied in the global banking environment as well as in India. In addition to presenting the big picture of the banking and financial services industry the book also provides useful tips on the trade off between risk and return.

Enron Nancy B. Rapoport, Bala G. Dharan, 2004 This law school text explores the Enron debacle from a variety of different aspects. Essays analyze the business government interactions and decisions that laid the foundations for Enron's growth and subsequent demise. Other essays describe and detail the complex web of partnerships and accounting tricks used by Enron to hide bad news and project good news. While other essays focus on the ethical and legal dimensions of the Enron crisis and their lessons for business and law students as well as for society.

THE ANALYSIS OF CYBER SECURITY THE EXTENDED CARTESIAN METHOD APPROACH WITH INNOVATIVE STUDY MODELS Diego ABBO, 2019-04-01 Cyber security is the practice of protecting systems networks and programs from digital attacks. These cyber attacks are usually aimed at accessing changing or destroying sensitive information extorting money from users or interrupting normal business processes. Implementing effective cyber security measures is particularly challenging today because there are more devices than people and attackers are becoming more innovative. This thesis addresses the individuation of the appropriate scientific tools in order to create a methodology and a set of models for establishing the suitable metrics and pertinent analytical capacity in the cyber dimension for social applications. The current state of the art of cyber security is exemplified by some specific characteristics.
