Artificial Intelligence Accelerates Human Learning Katashi Nagao, 2019-02-02

Focusing on students presentations and discussions in laboratory seminars this book presents case studies on evidence based education using artificial intelligence AI technologies It proposes a system to help users complete research activities and a machine learning method that makes the system suitable for long term operation by performing data mining for discussions and automatically extracting essential tasks By illustrating the complete process proposal implementation and operation of applying machine learning techniques to real world situations the book will inspire researchers and professionals to develop innovative new applications for education The book is divided into six chapters the first of which provides an overview of AI research and practice in education In turn Chapter 2 describes a mechanism for applying data analytics to student discussions and utilizing the results for knowledge creation activities such as research Based on discussion data analytics Chapter 3 describes a creative activity support system that effectively utilizes the analytical results of the discussion for subsequent activities Chapter 4 discusses the incorporation of a gamification method to evaluate and improve discussion skills while maintaining the motivation to participate in the discussion Chapters 5 and 6 describe an advanced learning environment for honing students discussion and presentation skills Two important systems proposed here are a presentation training system using virtual reality technologies and an interactive presentation discussion training system using a humanoid robot In the former the virtual space is constructed by measuring the three dimensional shape of the actual auditorium presentations are

performed in the same way as in the real world and the AI as audience automatically evaluates the presentation and provides feedback In the latter a humanoid robot makes some remarks on and asks questions about students presentations and the students practice responding to it **Publications of the National Institute of Standards and Technology ...
