Rotten Heart Of Europe:

The Rotten Heart of Europe Bernard Connolly, 2013-01-15 The Brussels Commission has just suspended its senior economist Bernard Connolly for writing a book savaging the prospects for a common currency There are many who now believe he should be lauded as a prophet Observer Editorial 1 October 1995 Mr Connolly's longstanding proposition that the foisting of a common currency upon so many disparate nations would end in ruin is getting a much wider hearing New York Times 17 November 2011 When first published in 1995 The Rotten Heart of Europe caused outrage and delight here was a Brussels insider a senior EU economist daring to talk openly about the likely pitfalls of European monetary union Bernard Connolly lost his job at the Commission but his book was greeted as a profound and persuasive expose of the would be monetary masters of the world His brave act of defiance became headline news and his book a major international bestseller In a substantial new introduction Connolly returns to his prophetic account of the double talk surrounding the efforts of politicians bankers and bureaucrats to force Europe into a crippling monetary straitjacket Hidden agendas are laid bare skulduggery exposed and economic fallacies are skewered producing a horrifying conclusion No one who wants to understand the workings of the EU past present and future can afford to miss this enthralling and deeply disturbing book

Flashpoint Andrew Murray, 1997 Offering a terrifying but very possible scenario of a world on the edge of disaster this work suggests that World War III has become a real threat Germany and Japan have gathered military strength the US has retrenched to make way for economic globalization the UN is widely discredited and NATO has lost its way In their place the bodies controlling the global economic order hold a growing authority in an increasingly unstable world In this book the author sets out to demonstrate that World Wars I and II were both preceded by trade disputes minor conflicts in peripheral zones and vain attempts to reconcile competing interests peacefully He argues that history is repeating itself and that the changing balance between the Great Powers after the collapse of the USSR have set the conditions for new conflict He maintains that there is a very real risk that the next flashpoint will ignite to create World War III

European Integration, 1950-2003 John Gillingham, 2003-06-02 Integration is the most significant

European historical development in the past fifty years eclipsing in importance even the collapse of the USSR Yet until now no satisfactory explanation is to be found in any single book as to why integration is significant how it originated how it has changed Europe and where it is headed Professor Gillingham's work corrects the inadequacies of the existing literature by cutting through the genuine confusion that surrounds the activities of the European Union and by looking at his subject from a truly historical perspective The late twentieth century has been an era of great though insufficiently appreciated accomplishment that intellectually and morally is still emerging from the shadow of an earlier one of depression and modern despotism This is a work then that captures the historical distinctiveness of Europe in a way that transcends current party political debate
