

Life Cycle Assessment for Mobile Products

■ Background

Samsung has developed strong technical expertise in assessing the life cycle environmental impacts of its product lines. The environmental life cycle assessment (LCA) has been for the Samsung Galaxy S21 series (S21E, S21, S21 FE, S21 Neo), the A23 series (A23, A23 Neo), Galaxy Z Fold 4 series (Z Fold 4, Z Fold 4 Neo), and Galaxy Z Flip 4 series (Z Flip 4, Z Flip 4 Neo).

Environmental quality: The analysis methodology has been completed according to International Standard ISO 14040 series. Samsung has used Simapro[®] software and a detailed LCA life cycle database to measure environmental impacts using a wide range of data categories including: production of external (BOB) parts and components, logistics, energy consumption, imported raw materials, life cycle maintenance, repair, and after-sales support. The subjects of the LCA considered and quantified 17 potential environmental impact categories including global warming, acidification, eutrophication, ozone depletion, acidification, acidification, and ozone layer depletion, where each impact category has been assessed for each life cycle stage. Based on the life cycle impact, it is considered that potential development plans should actively improve the environmental specifications of our products.

Product Design and Life Cycle Assessment Ireneusz Zbicinski, 2006 *Circular Business Models in the Mobile Phone Industry* David Watson, Anja Charlotte Gylling, Naoko Tojo, Harald Throne-Holst, Bjørn Bauer, Leonidas Milios, 2017-11-30 The circular economy offers opportunities to reduce resource use and waste whilst providing business opportunities. This is also true in the mobile phone industry that has been characterised by high rates of product obsolescence. The emergence of the smart phone has changed the landscape making repair, refurbishment and resale attractive to businesses and consumers. Moreover, emerging modular phone design should allow functional upgrades with low resource wastage. This report investigates the adoption of circular business models within Nordic markets. Producers, retailers, refurbishers, recyclers and resellers tell of their motivation, experiences and the challenges that they face. A special look is taken at consumer and waste law and the challenges and opportunities they represent. The report ends with 17 policy proposals that can accelerate the adoption of circularity in the sector.
