Rethinking EMI Lily I-Wen Su, Hintat Cheung, Jessica R. W. Wu, 2021-06-10 Due to the competitive edge it confers on students educational institutions and non English speaking nations in a globalized economy English as a medium of instruction EMI has been gaining popularity in tertiary education in non native English speaking NNEs countries Institute wide EMI implementation has often been imposed by top down decisions in combination with the optimistic view that the horse should always be placed before the cart However emerging evidence suggests that the delivery of such programs to NNEs students has led to new pedagogical challenges and learning problems that go beyond the scope of language learning and teaching and deserve immediate attention For example how would an instructor respond to situations in which students learning of content is compromised by their limited language proficiency This book draws on the current practice of EMI in diverse disciplines and university settings and examines how these new pedagogical and learning issues can be addressed The discussion also involves a reflection on the essence of EMI in relation to the use of the first language L1 as the medium of instruction in tertiary education In addition the book includes discussion about how to ensure and maintain the quality of EMI programs and assess the readiness of stakeholders for such programs which include administrators teachers and students The discussion is led by exemplars in Hong Kong and Taiwan where the majority of students are native Chinese speakers in the hope of developing critical perspectives and practical guidelines as references for EMI in other NNEs settings The Open Access version of this book available at <http://www.taylorfrancis.com/books/e> ISBN has been made available under a Creative
