Revolutionizing Product Development Quantum Leaps In Speed Efficiency And Quality By Wheelwright Steven C Clark Kim B 1992 Hardcover:

Revolutionizing Product Development Steven C. Wheelwright, Kim B. Clark, 1992-06-15 Today a company's capability to conceive and design quality prototypes and bring a variety of superior products to market quicker than its competitors is increasingly the focal point of competition contend leading product development experts Steven Wheelwright and Kim Clark Drawing on six years of in depth systematic worldwide research they present proven principles for developing the critical capabilities for speed efficiency and quality that have worked again and again in scores of successful Japanese American and European fast cycle firms The authors argue that to survive let alone succeed today's companies must construct a new platform with new methodologies on which they can compete Using their model for development strategies Wheelwright and Clark show that firms can create a solid architecture for the integration of marketing manufacturing and design functions for problem solving and fast action particularly during the critical design build test cycles of prototype creation They demonstrate further how successful firms such as Honda in automobiles Compaq in personal computers Applied Materials in semi conductors Sony in audio equipment The Limited in apparel and Hill Rom in hospital beds have employed recent methodologies to bring new products to market at break neck speed Such innovations include design for manufacturability quality function deployment computer aided design and computer aided engineering Finally Wheelwright and Clark emphasize the importance of learning in the organization Companies that consistently design it right the first time and follow a path of continuous improvement in product and process development have a formidable edge in the crucial race to market

Four Practical Revolutions in Management Shoji Shiba, David Walden, 2007-07-24 Shiba and Walden have significantly revised their classic *A New American TQM* With new methodologies and case studies this work is one of the most comprehensive studies of management theory and business success The authors identify a comprehensive approach to management that goes beyond operations improvement to help executives and manage *Academy of Management Journal* Academy of Management, 1992 Aug 1957 has first section Proceedings of the Academy of Management 1956 Design Issues, 1992 **The Bulletin**, 1992-09 *Bibliographic Guide to Business and Economics* New York Public Library. Research Libraries, 1976 *Ett sammandrag av boken: Revolutionizing product development - quantum leaps in speed, efficiency, and quality*, 1997 *The Quantum Leap-- in Speed-to-market* John R. Costanza, 1992 *The Quantum Leap > Implementation Skills* Steve Taylor-Jones, 2012-08-01 The first edition of *The Quantum Leap Speed to Market* written by John R Costanza in 1984 played a key role in communicating the manufacturing methods advocated by the use of Demand Flow r Technology DFT At that time John's documentation of the technology was new and implementation of the discipline produced a series of dramatic success stories as multiple manufacturing companies embraced the emerging business practices guided by Demand Flow r Technology In 2005 *The Quantum Leap Next Generation* book was released from Dean Gilliam and Steve

Taylor Jones to update the text and further document the Demand Flow r Business Strategy Many practitioners obtained their initial exposure to the technology and business strategy by reading The Quantum Leap books and attending education classes provided by DFT Experts in the field There was no detailed text book written previously to provide an explanation of the required implementation skills including practical advice related to the organization and deployment of Demand Flow r Technology This book provides the detailed explanation of each tool and technique comprising the body of knowledge of Demand Flow Technology and thus fulfils a guidance and reference role for the manufacturing engineering professional

Network Based High Speed Product Development Peter Lindgren, 2022-09-01 In the first decade of the 21st century product development in networks was predicted to be of ever increasing importance to businesses of all sizes because of changes in markets in technology in networks and in the competences of Businesses The growth in new products share of businesses total turnover and earnings were increasing at an unprecedented speed The entrepreneurial innovations and technological improvements had resulted in the increasingly fast development of new products and services Businesses and industries in different countries became increasingly more linked and interdependent in networks with respect to materials business operations and particularly product development to match the wants and needs of the global market environment to high speed product development Businesses were therefore encountering increasingly dynamic market fragmentation shrinking time in market increasing product variety demands of production to customer specifications reduced product lifetimes and globalization of production Networks were vital because the competition is not business against business but network against network Networks are vital because an increasing part of product development was carried out in all types of networks containing physical ICT dynamic and virtual networks Speed and pressure on time in product development seemed to continue to increase because customer demands for new products seemed to continue to increase However a Business seldom possessed all needed competences and managers saw product development based on networks as an important solution to meet the strong competition of the future global markets and the strong demand for innovation and innovativeness The evolution of market demands and focus required on competencies of businesses could be characterized as a development from a focus on efficiency to a focus on quality and flexibility to a focus on speed and innovativeness This was why it was interesting and important to research and discuss product development and especially to understand high speed product development of individualized products in fragile market segments Consequently findings and learning on aspects like enablers management tools technological tools product development models product development processes and network tools to speed new product development are presented in this book
