**Leadership At Scale** Claudio Feser, Michael Rennie, Nicolai Chen Nielsen, 2018-12-04 Traditional approaches to leadership development focus on a small number of individuals at the top. However, in today's world of constant change and decentralized decision making, organizations need effective leaders at all levels of their organizations. That requires a much broader and deeper pool of leadership talent, and most organizations fall far short of what they need. Leadership at Scale defines a new approach. In it, top experts at McKinsey, the world's number one leadership factory, expose the secrets of how to drive leadership development that reaches the entire organization, adapts to diverse contexts, and achieves impact at scale. Grounded in extensive research and the global experience of 25 leadership experts and illustrated with a fictional step-by-step case with numerous real-life examples, this book provides leaders with the systematic and fact-based approach they need to unlock organizational performance through leadership effectiveness

**An Inquiry into Women Representation in Management** Samapti Guha, Sanskruti Rajesh Kadam, 2024-06-18 This book explores the status of women representation in management in Indian industries. Recognizing that women managers are facing barriers in achieving top-level management positions in industries, it adopts a unique methodology of involving men and women managers as respondents to understand the key issues of gender diversity: glass ceiling, glass walls, glass cliffs, and gender inequality in the Indian corporate scenario. The book, via its six chapters, explores these key issues through the lens of feminist theories under four dimensions: personal, work, organisational, and social, and contains an extensive literature review to understand the root causes of these issues. Secondly, it discusses a pilot study conducted to understand the perspectives about career growth of women managers. Outcome of this pilot study works towards conceptualising factors under four dimensions mentioned above influencing women participation in management and to develop survey tools for further quantitative study. Thirdly, for the empirical analysis, the book employs exploratory factor analysis (EFA) to identify factors under each of these four dimensions, and the structure of the relationship between factors and women representation in management is confirmed by the confirmatory factor analysis (CFA). This book is beneficial for several stakeholders as it is a multidimensional study. It is useful for undergraduate and postgraduate students and research scholars of management, social sciences such as economics, gender studies, psychology, political sciences, sociology, etc., law, medicine, and engineering. Apart from this, it is also useful for corporate executives, decision makers of corporate governance, women elected representatives, administrators, development practitioners, teachers, legal experts, international agencies like UN who are working on women empowerment, and all those agencies working towards meeting SDG5 goal.
