**Algorithms for the People** Josh Simons,2025-07-08 How to put democracy at the heart of AI governance Artificial intelligence and machine learning are reshaping our world Police forces use them to decide where to send police officers judges to decide whom to release on bail welfare agencies to decide which children are at risk of abuse and Facebook and Google to rank content and distribute ads In these spheres and many others powerful prediction tools are changing how decisions are made narrowing opportunities for the exercise of judgment empathy and creativity In Algorithms for the People Josh Simons flips the narrative about how we govern these technologies Instead of examining the impact of technology on democracy he explores how to put democracy at the heart of AI governance Drawing on his experience as a research fellow at Harvard University a visiting research scientist on Facebook s Responsible AI team and a policy advisor to the UK s Labour Party Simons gets under the hood of predictive technologies offering an accessible account of how they work why they matter and how to regulate the

institutions that build and use them He argues that prediction is political human choices about how to design and use predictive tools shape their effects Approaching predictive technologies through the lens of political theory casts new light on how democracies should govern political choices made outside the sphere of representative politics Showing the connection between technology regulation and democratic reform Simons argues that we must go beyond conventional theorizing of AI ethics to wrestle with fundamental moral and political questions about how the governance of technology can support the flourishing of democracy

**Antiracism Inc** Felice Blake, 2019 Antiracism Inc considers new ways of struggling toward racial justice in a world that constantly steals and misuses radical ideas and practices The critical essays interviews and poetry collected here focus on people and methods that do not seek inclusion in the hierarchical order of gendered racial capitalism Rather they focus on aggrieved peoples who have always had to negotiate state violence and cultural erasure but who also work to build the worlds they envision These collectivities seek to transform social structures and establish a new social warrant guided by what W E B Du Bois called abolition democracy a way of being and thinking that privileges people mutual interdependence and ecological harmony over individualist self aggrandizement and profits Further these aggrieved collectivities reshape social relations away from the violence and alienation inherent to gendered racial capitalism and towards the well being of the commons Provided by publisher
