Expert Systems and Geographic Information Systems for Impact Assessment Agustin Rodriguez-Bachiller, John Glasson, 2004-08-12 Impact Assessment is becoming part and parcel of an increasing number of development proposals in the UK and Europe As the practice of Impact Assessment develops it becomes more standardized and good practice starts to be defined However the quality of Impact Assessment is still far from satisfactory Expert Systems and GIS for Impact Assessment

Smart Grids for Renewable Energy Systems, Electric Vehicles and Energy Storage Systems Rajkumar Viral, Anuradha Tomar, Divya Asija, U. Mohan Rao, Adil Sarwar, 2022-10-10 This comprehensive reference text discusses simulation with case studies and realworld applications related to energy system models the large scale integration of renewable energy systems electric vehicles and energy storage systems The text covers analysis and modeling of the large scale integration of renewable energy systems electric vehicles and energy storage systems It further discusses economic aspects useful for policy makers and industrial professionals It covers important topics including smart grids architectures wide area situational awareness WASA energy management systems EMS demand response DR smart grid standardization exertions virtual power plants battery degradation modeling optimization approaches in modeling and smart metering infrastructure The book Discusses the analysis and modeling of the large scale integration of renewable energy systems electric vehicles and energy storage systems Covers issues and challenges encountered in the large scale integration of electric vehicles energy storage systems and renewable energy systems into future smart grid design Provides simulation with case studies and real world applications related to energy system models electric vehicles and energy storage systems Discusses the integration of large renewable energy systems with the presence of a large number of electric vehicles and storage devices systems Discussing concepts of smart grids together with the deployment of electric vehicles energy storage systems and renewable energy systems this text will be useful as a reference text for graduate students and academic researchers in the fields of electrical engineering electronics and communication engineering renewable energy and clean technologies It further discusses topics including electric grid infrastructure architecture interfacing standardization protocols security reliability communication and optimal control

Springer Handbook of Geographic Information Wolfgang Kresse, David M. Danko, 2012-02-21 Computer science provides a powerful tool that was virtually unknown three generations ago Some of the classical fields of knowledge are

geodesy surveying cartography and geography Electronics have revolutionized geodetic methods Cartography has faced the dominance of the computer that results in simplified cartographic products All three fields make use of basic components such as the Internet and databases The Springer Handbook of Geographic Information is organized in three parts Basics Geographic Information and Applications Some parts of the basics belong to the larger field of computer science However the reader gets a comprehensive view on geographic information because the topics selected from computer science have a close relation to geographic information The Springer Handbook of Geographic Information is written for scientists at universities and industry as well as advanced and PhD students

Quality Aspects in Spatial Data Mining

Alfred Stein,Wenzhong Shi,Wietske Bijker,2016-04-19 Describes the State of the Art in Spatial Data Mining Focuses on Data Quality Substantial progress has been made toward developing effective techniques for spatial information processing in recent years This science deals with models of reality in a GIS however and not with reality itself Therefore spatial information processes are often imprecise

Marine and Coastal Geographical Information Systems Dawn J. Wright,Darius J. Barlett,1999-12-23 Marine and coastal applications of GIS are finally gaining wide acceptance in scientific as well as GIS communities and cover the fields of deep sea geology chemistry and biology and coastal geology biology engineering and resource management Comprising rigorous contributions from a group of leading scholars in marine and coastal GIS this book will inspire and stimulate continued research in this important new application domain Launched as a project to mark the UN International Year of the Ocean 1998 and supported by the International Geographical Union's Commission on Coastal Systems this book covers progress and research in the marine and coastal realms in the areas of theory applications and empirical results It is the first book of its kind to address basic and applied scientific problems in deep sea and coastal science using GIS and remote sensing technologies It is designed for GIS and remote sensing specialists but also for those with an interest in oceans lakes and shores Coverage ranges from seafloor spreading centres to Exclusive Economic Zones to microscale coastal habitats and techniques include submersibles computer modelling image display 3 D temporal data visualization and development and application of new algorithms and spatial data structures It illustrates the broad usage of GIS image processing and computer modelling in deep sea and coastal environments and also addresses important institutional issues arising out of the use of these technologies

Smart Buildings and Cities with Remote Sensing and GIS

Shiv Mohan,Navneet Munoth,Neha Sharma,2025-03-31 The built environment is undergoing a profound transformation driven by the integration of cutting edge geospatial technologies Smart Buildings and Cities with Remote Sensing and GIS serves as a comprehensive guide to navigating this transformation and bridges the gap between traditional architectural and planning practices and the innovative possibilities of remote sensing RS and geographic information systems GIS The book demonstrates how architects planners and decisionmakers can use GIS and RS to design smarter context aware and eco friendly urban spaces It explores innovative approaches for architecture focusing on geospatial site analysis net zero energy

building designs heritage preservation innovative virtual campus planning methodologies and even futuristic concepts like habitat design on the lunar surface Key features Brings together contemporary geospatial technologies and their applications to address the challenges and opportunities in designing smart buildings and cities Provides actionable solutions for professionals researchers and policymakers Includes global contributions that provide diverse perspectives on smart city and building applications Highlights how geospatial data driven insights can revolutionize decisionmaking processes in urban planning and building design The work is designed for postgraduate students and researchers in the departments of architecture planning and geomatics geoinformatics software engineering
