**The Global Lives of German Migrants** Marcel Erlinghagen,Andreas Ette,Norbert F. Schneider,Nils Witte,2021-04-29 Based on the German

case this open access book highlights the increasing flows of migration and the internationalisation of individual life courses. It analyses the experiences of migration across four central domains: employment and income, partners and families, health and wellbeing, as well as friends and social participation, which potentially have far-reaching consequences for social inequalities and life chances. The book showcases results from an innovative probability sample that is representative of German emigrants who recently moved abroad and remigrants who recently returned from abroad and compares their international experiences with the sedentary population in Germany. Stays abroad, whether temporary or permanent, have become the new normal for increasing numbers of people from highly developed welfare states. Unnoticed from mainstream migration studies, these countries are today not only major immigration countries but also important sources of international mobility. By providing an empirically founded prism of the global lives of German migrants, this book is a valuable resource for students and researchers of migration, social inequality, and the life course, and provides practitioners with insights into these regularly overlooked aspects of international migration.

*Handbook of Language and Mobility* Alfonso Del Percio, 2025-07-21. The Handbook of Language and Mobility challenges the assumption that mobility is a new norm. It maps new developments in language and mobility scholarship, tracing how the mobility of language, people, and knowledge intersects with multiplicity, infrastructures, historicity, new political formations, and processes of world making. By decentering mobility, this handbook questions which processes come to be recognized as mobile and how mobility is historically shaped, regulated, valued, and stigmatized. By recentring mobility, it explores its productive dimensions, how it sustains and aligns with celebratory ideologies of globalization, technology, and agency, creates value, and contributes to the management and legitimation of difference and inequality. Mobility here is not just about movement; it shapes time, space, subjectivities, power, and systems of accumulation.
