*Facility Management* Jens Nävy, 2018-06-15. Die Digitalisierung im Facility und Immobilienmanagement ist die aktuelle Herausforderung auf dem Weg zur durchgängigen Vernetzung und Automatisierung der Gebäude und Anlagen sowie der Prozesse von Nutzern, Betreibern und Eigentümern. Facility Management ist als Managementmethode in Deutschland etabliert und mittlerweile durch die europäische Normierung hinreichend konkretisiert. Das Buch trägt zur Professionalisierung des betrieblichen Facility und Immobilienmanagement unter Berücksichtigung der Ganzheitlichkeit, Lebenszyklusorientierung und Transparenz bei. Das klar gegliederte Buch legt einen Schwerpunkt auf die Informationstechnologie im Facility Management, das Computer Aided Facility Management (CAFM). Dabei setzt sich der Autor mit der wissenschaftlichen Betrachtung des digitalisierten Facility Managements genauso auseinander wie mit der praktischen Umsetzung von CAFM. Die fünfte Auflage wurde erheblich erweitert und aktualisiert. Sie beinhaltet u.a. eine neue Marktübersicht der CAFM-Systeme sowie die aktuelle Entwicklung von SAP zum Thema Real Estate und behandelt das Building Information Modeling (BIM) im Kontext des Facility Managements.

*BIM for Facility Managers* IFMA, 2013-04-03. A practical look at extending the value of Building Information Modeling (BIM) into facility management from the world's largest international association for professional facility managers. Building owners and facility managers are discovering that Building Information Modeling (BIM) models of buildings are deep reservoirs of information that can provide valuable spatial and mechanical details on every aspect of a property. When used appropriately, this data can improve performance and save time, effort, and money in running and maintaining the building during its life cycle. It can also provide information for future modifications. For instance, a BIM could reveal everything from the manufacturer of a light fixture to its energy usage to maintenance instructions. BIM for Facility Managers explains how BIM can be linked to facility management (FM) systems to achieve very significant life cycle advantages. It presents guidelines for using BIM in FM that have been developed by public and private owners such as the GSA. There is an extensive discussion of the legal and contractual issues involved in BIM-FM integration. It describes how COBie can be used to name capture and communicate FM-related data to

downstream systems There is also extensive discussion of commercial software tools that can be used to facilitate this integration This book features six in depth case studies that illustrate how BIM has been successfully integrated with facility management in real life projects at Texas A M Health Science Center USC School of Cinematic Arts MathWork s new campus Xavier University State of Wisconsin Facilities University of Chicago Library renovation BIM for Facility Managers is an indispensable resource for facility managers building owners and developers alike
