Robinson presents a big picture snapshot of the crisis of capitalism and the battle for the future of humanity Drawing on 30 years of scholarship and activism Robinson applies his original theory of global capitalism to the emerging digital age He shows how global elites have pinned their hope on economic reactivation through the application of radical new digital technologies and financial strategies to the global economy and society The rulers will turn to enhancing a global police state to contain mass rebellion as humanity enters a season of chaos and global civil war The capitalist class and privileged strata of humanity may be able to survive collapse for decades to come even as a majority of humanity faces desperate struggles for survival that lead many to perish in the coming years But there is eventually a terminal point to capitalist expansion as mass extinction and the radical alteration of the natural environment make life for our species and most others impossible The only solution is a reversal of escalating inequalities through a radical redistribution of wealth and power

La gestion des risques de sous-traitance manufacturière en Chine Jalal El Fadil, 2014-04-09T00:00:00-04:00

La vive concurrence que se livrent les entreprises dans l'économie mondialisée oblige les dirigeants à faire preuve de créativité pour réduire leurs coûts de production et accroître leur productivité. La sous-traitance dans les pays émergents avec leurs capacités industrielles considérables et leur main-d'œuvre abondante et bon marché devient ainsi une tendance croissante. La Chine ce titre est devenue le point de mire de nombreux dirigeants de petites et grandes entreprises canadiennes. Mais l'aventure peut se révéler complexe et risquée. Afin de donner aux entrepreneurs une meilleure vision des risques qui peuvent influencer la réalisation de leurs objectifs, l'auteur définit et analyse les risques associés aux projets de sous-traitance en Chine, que ce soit sur le plan des coûts de la qualité ou des délais de production. Par une étude approfondie des expériences de sept entreprises manufacturières canadiennes, il explore également les pratiques de gestion utilisées pour résoudre les problèmes rencontrés. Car la présence de facteurs de risque ne doit pas être perçue comme une entrave définitive aux objectifs de la sous-traitance dans les pays émergents, il s'agit plutôt de les reconnaître pour mieux les contrôler.
