Golden Guide Class 10 Social Science:

Resources in Education ,2001-10 Nationale Machtfelder und globalisierte Eliten Christian Schneickert,2017-09-12

Die kapitalistische Globalisierung führte zu einer historisch einmaligen Konzentration von Macht und Reichtum in den Händen weniger. Die öffentliche Diskussion hierüber wird dabei meist von Verschwörungstheorien einer angeblich omnipotenten globalen Elite bestimmt. Eine kritische sozialwissenschaftliche Theorie von Macht und Eliten im Kontext der Globalisierung fehlte jedoch bislang. Christian Schneickert stellt eine empirisch fundierte Aktualisierung der sozialwissenschaftlichen Elitentheorie vor. Er analysiert hierfür die Sozialstruktur und Globalisierung politischer und wirtschaftlicher Eliten in vier sehr unterschiedlichen Staaten des globalen Nordens und Südens: Brasilien, Deutschland, Indien und den USA. Biografische Daten von 336 Spitzenpolitikern sowie Vorständen von Global 2000 Unternehmen bieten die empirische Grundlage.

The Athenaeum ,1862 *Resources for Teaching Middle School Science* Smithsonian Institution, National Academy of Engineering, National Science Resources Center of the National Academy of Sciences, Institute of Medicine, 1998-04-30. With age appropriate inquiry centered curriculum materials and sound teaching practices middle school science can capture the interest and energy of adolescent students and expand their understanding of the world around them. Resources for Teaching Middle School Science developed by the National Science Resources Center (NSRC) is a valuable tool for identifying and selecting effective science curriculum materials that will engage students in grades 6 through 8. The volume describes more than 400 curriculum titles that are aligned with the National Science Education Standards. This completely new guide follows on the success of Resources for Teaching Elementary School Science, the first in the NSRC series of annotated guides to hands-on inquiry centered curriculum materials and other resources for science teachers. The curriculum materials in the new guide are grouped in five chapters by scientific area: Physical Science, Life Science, Environmental Science, Earth and Space Science, and Multidisciplinary and Applied Science. They are also grouped by type: core materials, supplementary units, and science activity books. Each annotation of curriculum material includes a recommended grade level, a description of the activities involved, and of what students can be expected to learn, a list of accompanying materials, a reading level, and ordering information. The curriculum materials included in this book were selected by panels of teachers and scientists using evaluation criteria developed for the guide. The criteria reflect and incorporate goals and principles of the National Science Education Standards. The annotations designate the specific content standards on which these curriculum pieces focus. In addition to the curriculum chapters, the guide contains six chapters of diverse resources that are directly relevant to middle school science. Among these is a chapter on educational software and multimedia programs, chapters on books about science and teaching, directories and guides to science trade books and periodicals for teachers and students. Another section features institutional resources. One chapter lists about 600 science centers, museums, and zoos where teachers can take middle school students for interactive science experiences. Another chapter describes nearly 140 professional associations.
