

### Phobia

"A phobia is an intense fear of something that, in reality, poses little or no actual danger. Common phobias and fears include closed-in places, heights, highway driving, flying insects, snakes, and needles" (Phobias and Fears, 2011). "Anxiety and fear are normal responses to the perceived threat" (Pearlfoxy, 2005, p.2). However the perceived threats need not be the real ones always. Many thoughts about unrealistic threats can be referred as phobias. Almost the entire people have some kind of phobias. In other words, everyone has some kind of irrational fear which is often labeled as phobias. For example, some people are afraid of rats whereas others are afraid of even cockroaches. In psychology, phobia is labeled as an anxiety disorder in which the patient may develop persistent fear or anxieties about an object or situation. Majority of the phobias develops during childhood and in some cases, it may carry throughout the entire life span of the person. This paper analyses various symptoms, causes and remedies or treatment options for phobias.

### Symptoms of phobias

Phobias can be classified into different categories such as; animal phobias, environment phobias, situational phobia, injury phobia etc. Even though phobias can be labeled as some kind of fears, all the fears are not phobias. For example, a person Experiencing butterflies when peering down from the top of a skyscraper or climbing a tall ladder cannot be labeled as phobia whereas Turning down a great job because it's on the 10th floor of the office building is definitely a kind of phobia (Phobias and Fears, 2011). In the first case, the person is facing fear

### The College Fear Factor Rebecca D. Cox, 2009-10-30

They re not the students strolling across the bucolic liberal arts campuses where their grandfathers played football They are first generation college students children of immigrants and blue collar workers who know that their hopes for success hinge on a degree But college is expensive unfamiliar and intimidating Inexperienced students expect tough classes and demanding remote faculty They may not know what an assignment means what a score indicates or that a single grade is not a definitive measure of ability And they certainly don t feel entitled to be there They do not presume success and if they have a problem they don t expect to receive help or even a second chance Rebecca D Cox draws on five years of interviews and observations at community colleges She shows how students and their instructors misunderstand and ultimately fail one another despite good intentions

Most memorably she describes how easily students can feel defeated by their real world responsibilities and by the demands of college and come to conclude that they just don't belong there after all Eye opening even for experienced faculty and administrators The College Fear Factor reveals how the traditional college culture can actually pose obstacles to students success and suggests strategies for effectively explaining academic expectations
