*Marine Pollution Control* Iliana Christodoulou-Varotsi, 2018-04-24 This book discusses in a concise manner the key aspects that are important for the understanding of regulations and managerial framework governing marine pollution. It identifies the practical context in which marine pollution comes into play and addresses the international legal regime governing the numerous sources of marine pollution as well as the ways in which these regulations affect the conduct of day to day shipping operations. With illustrations, case studies, emphasis boxes, references to case law and to national jurisdictions and other tools facilitating understanding and knowledge, readers will find helpful guidance on the sources of marine pollution including ship source pollution and pollution from the offshore oil and gas sector, the forms of cooperation needed in order to tackle the prevention, management and response to marine pollution, overview of MARPOL Convention, other key IMO conventions and selected regional regimes, legal ramifications including P involvement of the flag State, coastal State and port State, industry best practice, the human element. *Marine Pollution Control* will be a useful guidance tool for shipping industry professionals, P I Clubs, legal practitioners, maritime administrators as well as academics and students of marine pollution.

*Area-Based Management of Shipping* Aldo Chircop, Floris Goerlandt, Ronald Pelot, Claudio Aporta, 2024-06-17 This open access book fills a gap in the literature on shipping in a number of cross-cutting fields including marine transportation law and policy, law of the sea, indigenous rights, marine environmental management and risk and safety studies. Moreover, the book includes a focus on the consideration of indigenous rights in shipping, a topic of emerging importance. There are, to our knowledge, no directly competing titles with the same interdisciplinary approach to conceptualize, understand and describe best practices for area-based management approaches. There are, however, related titles which cover some aspects of area-based management, usually from narrow disciplinary perspectives. Area-based management in the governance of shipping has become a useful and effective approach to promote maritime safety, maritime security and pollution prevention and to mitigate the adverse impacts of shipping on the marine environment and coastal communities. Based on the results of a research project and a major workshop convened at Dalhousie University in Canada, this book consists of multidisciplinary studies and analyses of major issues pertaining to area-based management in shipping from a comparative perspective but with the principal focus on Canada. The book contains both theoretical and empirical contributions.

*The International Law of the Sea* Yoshifumi Tanaka, 2023-03-02 This new edition has been revised and updated to provide current and comprehensive coverage of essential issues of the international law of the sea in a systematic manner. This book presents two paradigms of the law of the sea: the law of divided oceans and the law of our common ocean. It covers contemporary issues such as protection of the marine biological diversity, marine plastic pollution, the Arctic and impacts of climate change on the oceans. Following the clear and accessible approach of previous editions with many illustrations and tables, *The International Law of the Sea* continues to help students to best understand the law of the sea.
