Review Migrants To The Coasts Livelihood Resource:

Megacities and the Coast Mark Pelling, Sophie Blackburn, 2014-01-03 Based on a major international study this volume provides a synthesis of scientific knowledge on megacity urbanization on the coast environmental impacts risks and management choices including a focus on adaptation mitigation and disaster risk management It is the primary output of a major international scientific project sponsored by the International Geosphere Biosphere Programme the Land Ocean Interactions at the Coastal Zone programme of IHDP IGBP and others It brings together the work of over 60 contributing authors and an international review board It presents the international policy and academic community with an unbiased and high quality assessment of the state of the art in areas of social ecological systems interaction One of its main messages is that while we know a great deal about megacities of more than ten million people and about urban processes and about coasts and their physical and ecological processes aquatic physical and atmospheric there is relatively little work that focusses primarily at points of intersection between large scale urbanization and the coast The book responds to this gap by providing the first global synthesis of megacity and large urban region urbanization on the coast Its focus is on environmental and development challenges climate change and disaster It is interdisciplinary and brings together world recognised scientists including many IPCC lead authors on urban climate and atmosphere disaster risk management demography and coastal environments

Towards Coastal Resilience and Sustainability C. Patrick Heidkamp, John Morrissey, 2018-09-28 Coastal zones represent a frontline in the battle for sustainability as coastal communities face unprecedented economic challenges Coastal ecosystems are subject to overuse loss of resilience and increased vulnerability This book aims to interrogate the multi scalar complexities in creating a more sustainable coastal zone Sustainability transitions are geographical processes which happen in situated particular places However much contemporary discussion of transition is either aspatial or based on implicit assumptions about spatial homogeneity This book addresses these limitations through an examination of socio technological transitions with an explicitly spatial focus in the context of the coastal zone The book begins by focusing on theoretical understandings of transition processes specific to the coastal zone and includes detailed empirical case studies The second half of the book appraises governance initiatives in coastal zones and their efficacy The authors conclude with an implicit theme of social and environmental justice in coastal sustainability transitions Research will be of interest to practitioners academics and decision makers active in the sphere of coastal sustainability The multi disciplinary nature encourages accessibility for individuals working in the fields of Economic Geography Regional Development Public Policy and Planning Environmental Studies Social Geography and Sociology
