Jeffrey L. Derevensky, Daniel T. L. Shek, Joav Merrick, 2011-10-27 Youth gambling represents a potentially serious public policy and health issue. Nevertheless, the rise in youth gambling issues and problems in the global context is not matched with a parallel increase in research on adolescent gambling. As such, there is an urgent need to conduct more studies on adolescent gambling behaviour. Recently, significant advances in the knowledge of the risk factors associated with adolescent problems have emerged. This book addresses issues related to prevalence assessment, prevention and treatment of youth gambling problems, as well as concerns related to technological changes associated with youth problem gambling. *Audio Visual Journal*, 1970 *Dataquest*, 2007 **Services Marketing** C. Bhattacharya, 2009 While most books on marketing and services are readable, very few take the student's viewpoint and set out to answer the question: Is it understandable in the affirmative? This book and its pedagogy have been designed precisely with this in mind. *v Design* The book has a consistency of design that is innovative with aesthetic appeals. *v Opening and Closing Cases* Every chapter begins and ends with a case. The cases introduce the primary theme and issues discussed in the chapter and close with analytical tasks for the students. The cases are original, pertaining to Indian situations, companies and protagonists, helping the Indian students to connect. *v Objectives* Every chapter has clear learning expectations. *v Get a glimpse of the chapter context and their respective importance* *v End of chapter Questions* The questions are many and have been designed carefully to enhance learning for the students. There are elements of research project work and academic exercises in them. *v Illustrations* The book is generous with pleasing and informative charts, tables and diagrams. *v Glossary* The Appendix at the end of the book contains a glossary of services and marketing terminologies. *v Marketing models* In addition to the text, the appendix also contains major marketing models mentioned in the text, which are frequently used by the marketers. *v How to do cases* The Appendix also contains a useful section for all students: a template for case discussion and analysis. There are four parts in the book. Part I takes an overview look at the major differences between services and goods and their characteristics, classifications and different models. It methodically analyses the section on the local, domestic and international conditions and environmental factors that have affected services. It also examines the importance of Relationship Marketing in services. Part II examines in depth the marketing of services. It looks sweepingly and with depth at marketing planning and strategy, service buying behaviour, knowledge management and marketing research in services and the seven marketing mix variables for services. Part III is about the assessment of service delivery and customer relationship management. Part IV deals exclusively with comprehensive service cases. The cases are in addition to the opening and closing cases. The book lucidly explains the basic concepts of services and marketing and fills a long-standing need of the students for a book on both services and marketing.
