

Greatest Discoveries with Bill Nye in Physics

ANSWER KEY

Discovery	Scientist(s)	Time Marker in Video
1. The Law of Falling Bodies (1589) For over 2,000 years it was believed that heavier objects would fall faster. Galileo decided to test this. He found that heavier objects seem to fall faster because of air resistance, but if we strip the object from air resistance, then they fall at the same rate. Galileo's experiments also led to our current understanding of the acceleration caused by gravity.	Galileo Galilei	2:05 – 6:10
2. Universal Gravitation (1687) Legend has it that Newton's idea of gravity all started with watching an apple fall from a tree. He realized that the same gravitational force was affecting the apple and the moon alike. He reasoned that gravity is everywhere. Gravity traps the moon in orbit with the Earth. He developed the Law of Universal Gravitation, universal because gravity affects everything. Tides are higher when closer to the moon.	Sir Isaac Newton	6:10 – 8:26
3. Law of Motion (1687) The laws explain the movement of all physical objects. The 1st law says that an object in motion will stay in motion unless acted on by an outside force (something else acting on object & slow it down). The 2nd law says that force is equal to the mass times the acceleration. The 3rd law says the an for every action there is an equal and opposite reaction. If you punch your nose in the face, you will probably break something in the reaction with the other player's face.	Sir Isaac Newton	8:26 – 9:43
4. The Second Law of Thermodynamics (1900) The science of heat turned into the energy of motion. This was very important during the industrial revolution. Clausius developed the 2nd law of thermodynamics, his law states that in any energy conversion, you will lose some energy in the process. The loss is called entropy. In a car only about 20% of the energy of the gas goes into moving the car.	Rudolf Clausius	9:43 – 12:10
5. Electromagnetism (1821, 1865) The dynamo is a great engineering feat. It produces 2,000,000 horsepower of electricity using a magnet. Scientists discovered that they could create a magnet by running electricity through loops of wire. If Stanley Spenset out	Michael Faraday James Clerk Maxwell	12:10 – 16:41
