## **Project Title: An evaluation of educational interventions for improving knowledge of coastal drowning prevention**

### **Project Summary**

This PhD project is a part of the ARC-funded study 'Science of the Surf (SOS): The Development and Evaluation of a National Campaign to Reduce the Risk of Coastal Drowning'. The incidence of coastal drowning will be estimated using current surveillance systems in NSW, including hospital inpatient and coroner's data. Surf lifesaving reports (if available) will be also scrutinised for drowning mechanisms. This data will be used in order to identify patterns of drowning and priority areas for intervention. Gaps in beach safety knowledge and the need for educational intervention will be identified using survey methodologies. For example, the SOS study demonstrated a lack of knowledge by beachgoers in identifying rip currents and dumping waves as key areas for further exploration. The PhD student will trial various educational approaches for improving coastal safety knowledge. Their effectiveness for improving coastal safety knowledge will also be assessed. The results of the project will provide critical knowledge regarding methods for improving coastal safety knowledge. The findings can be used as a template to guide further drowning prevention interventions using a range of media.

### **Aims of the Project:**

- To develop and implement a range of educational intervention materials aimed at improving coastal safety knowledge;
- To evaluate the effectiveness of different types of educational interventions and media;
- To identify the most effective education intervention method for improving coastal safety knowledge.

### **Significance of the Project:**

- Determines the demographics, patterns and trends in coastal drowning;
- Provides a data-driven basis of drowning prevention priorities;
- Determines effectiveness of educational interventions for improving coastal safety knowledge;
- Provides beach safety practitioners in Australia with effective preventative countermeasure(s).

### **Research Plan:**

*Descriptive epidemiological study, including retrospective reviews of surveillance data to identify cases of coastal drowning:*

- Hospitalisation inpatient records (HOIST) for cases of coastal drowning
- Surf Life Saving Australia drowning incidence records
- Coroner reports for deaths due to coastal drowning

*Investigate coastal safety knowledge and identify gaps in current knowledge by survey of beachgoers:*

- Questionnaire
- Telephone interviews
- Face-to-face interviews
