The Oxford Handbook of African Archaeology Peter Mitchell, Paul Lane, 2013-07-04 Africa has the longest and arguably the most diverse archaeological record of any of the continents It is where the human lineage first evolved and from where Homo sapiens spread across the rest of the world Later it witnessed novel experiments in food production and unique trajectories to urbanism and the organisation of large communities that were not always structured along strictly hierarchical lines Millennia of engagement with societies in other parts of the world confirm Africa s active participation in the construction of the modern world while the richness of its history ethnography and linguistics provide

unusually powerful opportunities for constructing interdisciplinary narratives of Africa's past. This Handbook provides a comprehensive and up-to-date synthesis of African archaeology covering the entirety of the continent's past from the beginnings of human evolution to the archaeological legacy of European colonialism. As well as covering almost all periods and regions of the continent, it includes a mixture of key methodological and theoretical issues and debates and situates the subject's contemporary practice within the discipline's history and the infrastructural challenges now facing its practitioners. Bringing together essays on all these themes from over seventy contributors, many of them living and working in Africa, it offers a highly accessible contemporary account of the subject for use by scholars and students of not only archaeology but also history, anthropology and other disciplines.

The Importance of British Material Culture to Historical Archaeologies of the Nineteenth Century Alasdair Brooks, 2016. Britain was the industrial and political powerhouse of the nineteenth century, the birthplace of the Industrial Revolution and the center of the largest empire of the time. With its broad imperial reach and even broader indirect influence, Britain had a major impact on nineteenth-century material culture worldwide. Because British manufactured goods were widespread in British colonies and beyond, a more nuanced understanding of those goods can enhance the archaeological study of the people who used them far beyond Britain's shores. However, until recently, archaeologists have given relatively little attention to such goods in Britain itself, thereby missing what is often revealing and useful contextual information for historical archaeologists working in countries where British goods were consumed while also leaving significant portions of Britain's own archaeological record poorly understood. The Importance of British Material Culture to Historical Archaeologies of the Nineteenth Century helps fill these gaps through case studies demonstrating the importance and meaning of mass-produced material culture in Britain from the birth of the Industrial Revolution (mid-1700s) to early World War II. By examining many disparate items such as ceramics made for export, various goods related to food culture, Scottish land documents, and artifacts of death, these studies enrich both an understanding of Britain itself and the many places it influenced during the height of its international power.

Animated by Uncertainty Joshua D. Rubin, 2021-09-28. Examines the political significance of rugby in South Africa's post-apartheid present.

International Handbook of Historical Archaeology Teresita Majewski, David Gaimster, 2009-06-07. In studying the past, archaeologists have focused on the material remains of our ancestors. Prehistorians generally have only artifacts to study and rely on the diverse material record for their understanding of past societies and their behavior. Those involved in studying historically documented cultures not only have extensive material remains but also contemporary texts, images, and a range of investigative technologies to enable them to build a broader and more reflexive picture of how past societies, communities, and individuals operated and behaved. Increasingly, historical archaeology refers not to a particular period, place, or a method but rather an approach that interrogates the tensions between artifacts and texts irrespective of context. In short, historical archaeology provides direct evidence for how humans have shaped the world we live in today. Historical archaeology is a

branch of global archaeology that has grown in the last 40 years from its North American base into an increasingly global community of archaeologists each studying their area of the world in a historical context Where historical archaeology started as part of the study of the post Columbian societies of the United States and Canada it has now expanded to interface with the post medieval archaeologies of Europe and the diverse post imperial experiences of Africa Latin America and Australasia The 36 essays in the International Handbook of Historical Archaeology have been specially commissioned from the leading researchers in their fields creating a wide ranging digest of the increasingly global field of historical archaeology The volume is divided into two sections the first reviewing the key themes issues and approaches of historical archaeology today and the second containing a series of case studies charting the development and current state of historical archaeological practice around the world This key reference work captures the energy and diversity of this global discipline today

Maritime Archaeology and Social Relations Virginia Dellino-Musgrave, 2006-11-22 This book analyses British action in the Southern hemisphere in the late 18th century examining two Royal Navy ships one off the Argentinean coast and one off the Southeast Australian coast The author goes beyond a descriptive analysis of wrecks by treating them and their cargoes as embodiments of 18th century social relations The book challenges traditional approaches providing a perspective that emphasises the richness diversity and complexity of British action

Popular Politics in the History of South Africa, 1400-1948 Paul S. Landau, 2010-09-20 Popular Politics in the History of South Africa 1400 1948 offers an inclusive vision of South Africa s past Drawing largely from original sources Paul Landau presents a history of the politics of the country s people from the time of their early settlements in the elevated heartlands through the colonial era to the dawn of Apartheid A practical tradition of mobilization alliance and amalgamation persisted mutated and occasionally vanished from view it survived against the odds in several forms in tribalisms Christian assemblies and other seemingly hybrid movements and it continues today Landau treats southern Africa broadly concentrating increasingly on the southern Highveld and ultimately focusing on a transnational movement called the Samuelites He shows how people s politics in South Africa were suppressed and transformed but never entirely eliminated

The Materiality of Individuality Carolyn L. White, 2009-08-15 Generally individuals in history are known for a particular reason they somehow influenced history Very little is known about the ordinary person who lived in the past But historical archaeologists through their interpretation of the material culture and historic record can study the past on an individual level This brings archaeological interpretation from a micro to a macro level as opposed to the traditional level of society to community to individual interpretation The cases presented in this volume engage material culture that is owned or used by a single person and is thus associated with an individual at some point in its use life The volume takes bodkins shoes beads cloth religious items grave goods as well as subassemblages from well defined contexts from New England the Chesapeake New Orleans Hawaii Spanish colonial America and London in the pursuit of the individual and the textured interpretation this analytical scale provides This volume promises to present

innovative approaches to a host of archaeological materials drawing widely on the range of archaeological research for the historical period today Capitalizing on several topics and research threads with great currency such as the examination of material culture and interest in various and intersecting lines of identity construction as well as presenting an international and multiregional approach to these topics this volume will be of interest to archaeologists anthropologists material culture scholars and social historians interested in a wide variety of time periods and subfields **Insanity, identity and empire**

Catharine Coleborne, 2015-10-01 This book examines the formation of colonial social identities inside the institutions for the insane in Australia and New Zealand Taking a large sample of patient records it pays particular attention to gender ethnicity and class as categories of analysis reminding us of the varied journeys of immigrants to the colonies and of how and where they stopped for different reasons inside the social institutions of the period It is about their stories of mobility how these were told and produced inside institutions for the insane and how in the telling colonial identities were asserted and formed Having engaged with the structural imperatives of empire and with the varied imperial meanings of gender sexuality and medicine historians have considered the movements of travellers migrants military bodies and medical personnel and transnational lives This book examines an empire wide discourse of madness as part of this inquiry *Envisioning*

Landscape Dan Hicks, Laura McAtackney, Graham Fairclough, 2016-06-03 The common feature of landscape archaeology is its diversity of method field location disciplinary influences and contemporary voices The contributors to this volume take advantage of these many strands to investigate landscape archaeology in its multiple forms focusing primarily on the link to heritage the impact on our understanding of temporality and the situated theory that arises out of landscape studies Using examples from New York to Northern Ireland Africa to the Argolid these pieces capture the human significance of material objects in support of a more comprehensive nuanced archaeology Archaeologies of Mobility and Movement Mary C

Beaudry, Travis G. Parno, 2013-02-06 This collection of essays in Archaeologies of Mobility and Movement draws inspiration from current archaeological interest in the movement of individuals things and ideas in the recent past Movement is fundamentally concerned with the relationships among time object person and space The volume argues that understanding movement in the past requires a shift away from traditional fieldwork based archaeological ontologies towards fluid trajectory based studies Archaeology by its very nature locates objects frozen in space literally in their three dimensional matrices at sites that are often stripped of people An archaeology of movement must break away from this stasis and cut new pathways that trace the boundary crossing contextuality inherent in object person mobility Essays in this volume build on these new approaches confronting issues of movement from a variety of perspectives They are divided into four sections based on how the act of moving is framed The groups into which these chapters are placed are not meant to be unyielding or definitive The first section Objects in Motion includes case studies that follow the paths of material culture and its interactions with groups of people The second section of this volume People in Motion features chapters that explore the

shifting material traces of human mobility Chapters in the third section of this book Movement through Spaces illustrate the effects that particular spaces have on the people and objects who pass through them Finally there is an afterward that cohesively addresses the issue of studying movement in the recent past At the heart of Archaeologies of Mobility and Movement is a concern with the hybridity of people and things affordances of objects and spaces contemporary heritage issues and the effects of movement on archaeological subjects in the recent and contemporary past

The Archaeology of Southern Africa Peter Mitchell, 2024-06-06 This revised and updated edition provides a comprehensive synthesis of Southern Africa's archaeology over more than 3 million years

The Scandinavian Early Modern World Jonas Monié Nordin, 2020-05-14 The Scandinavian Early Modern World explores the early modern colonialism globalization and modernity in Scandinavia along with its colonies and its role in the shaping of the modern world Scandinavians played an active role in early modern globalization and were present as traders as colonialists and as consumers in competition and collaboration with indigenous agents and other colonial actors in America Africa and India This story is rarely told The joint study of history historical landscape and material culture from a Scandinavian vantage point provides for a comprehensive and original interpretation of the birth of globalization and modernity New perspectives and data are presented deepening and challenging our knowledge of the long seventeenth century In depth analysis of case studies encompassing four continents and their material entanglement makes this book a unique contribution to historical archaeology The Scandinavian Early Modern World aims at students and scholars of anthropology archaeology and history alike taking interest in the global connections of the long seventeenth century and the role of Scandinavia in that process

History, Theory and Philosophy in Archaeology Tim Murray, 2025-02-03 This collection of essays the bulk of which have been previously published by Emeritus Professor Tim Murray ranges widely across contemporary archaeological theory and the history of archaeology while retaining a focus on the archaeology of Australia The collection is introduced by a new essay The evolution of archaeological theory that sets the agenda for the collection In doing this Murray explores the critical intersection between archaeology philosophy and the social and cultural context of its practice in Australia and elsewhere The collection brings together ideas about time scale and strategies for the evaluation of archaeological concepts and categories which are then applied to an understanding of significant issues raised by writing the archaeology of Australia from the Pleistocene to the present The essays have been drawn from over 30 years of research and writing about archaeological inquiry into the theories and methods of the
