

CASE STUDY:

Nike Uses Knowledge Transfer to Manage Change and Increase Innovation in Offshore Teams (2012)

Introduction: The Footwear Division of Nike—a Fortune 500 global manufacturer and marketer of athletic wear and equipment—was seeking to shift certain lower-level tasks related to product development from one job role and location to another, freeing up key positions to work on more complex, next-generation products. Nike had already spent two years trying to transfer these tasks, as part of a project called Shared Product Creation.

“*We are trying to make a seismic shift in what we’ve got Developers focused on.*” — DIRECTOR OF FOOTWEAR PRODUCT DEVELOPMENT OPERATIONS

I. THE BUSINESS PROBLEM

1. Nike’s Footwear Developers working in their Asian Nike Liaison Offices (NLOs) needed to take on more innovative projects to speed product development. These Developers, not having been required to innovate much in the past, needed to be “taught” how to take on more high-innovation projects.
2. Taking on higher innovation/more complex projects would require NLO Developers to work in a different capacity than in the past, but these new job role expectations were unclear. It was also unclear whether or not all of the current NLO Developers had the capability to perform in the new role. The role needed better definition and the path to success needed to be measurable to reduce the risk of failure.
3. Less complex tasks of NLOs needed to be shifted to job roles in the Product Creation Centers

Edition Prof Graham Hooley, Brigitte Nicoulaud, John Rudd, Nick Lee, 2020-01-09 Marketing Strategy and Competitive

Positioning 6e deals with the process of developing and implementing a marketing strategy. The book focuses on competitive positioning at the heart of marketing strategy and includes in depth discussion of the processes used in marketing to achieve competitive advantage. The book is primarily about creating and sustaining superior performance in the marketplace. It focuses on the two central issues in marketing strategy formulation: the identification of target markets and the creation of a differential advantage. In doing that it recognises the emergence of new potential target markets born of the recession and increased concern for climate change and it examines ways in which firms can differentiate their offerings through the recognition of environmental and social concerns. The book is ideal for undergraduate and postgraduate students taking modules in Marketing Strategy, Marketing Management and Strategic Marketing Management.

The Globalisation of Corporate Governance Adrian Davies, 2016-03-09. The structure of corporate governance has made significant progress in OECD countries but it remains imperfectly linked to the activities of many businesses. Its advance on the global stage will be hesitant and slow until its practice in OECD countries is more consistent and convincing. Weaknesses in corporate governance and law enforcement are impeding the investment needed to build the global economy to its full potential.

The Globalisation of Corporate Governance: The Challenge of Clashing Cultures explores the challenges of making corporate governance effective for all participants in a global economy. The tasks of o

Managing in Developing Countries James E. Austin, 1990. The Management Challenge: What Is Different About Managing in Developing Countries? Whom Is This Book For? How Is the Book Organized? Managing Corporate Legitimacy Dorothee Baumann-Pauly, 2017-09-08. The failure of many governments to provide basic rights for their citizens has given rise to the expectation that globally operating corporations should step in and fill governance gaps for example in the area of human rights. Today many large multinational corporations claim to conduct business in a socially responsible manner yet no tools

exist to assess whether and to what degree they have indeed systematically revised their business practices to take on these new responsibilities Managing Corporate Legitimacy addresses these research gaps by clarifying the role of the corporation as a private actor in global governance at conceptual and empirical levels by contributing to our theoretical understanding of CC as a new phenomenon in globalization and by furthering the development of appropriate approaches to CC in practice through its toolkit The tool structures the implementation process in five learning stages defensive compliance managerial strategic and civil The final civil stage describes political corporate behaviour The author includes an empirical assessment of five Swiss multinationals in this book which reveals that most companies even those with relatively long standing and mature policies on social and environmental issues have only just started to learn how to become corporate citizens The book therefore concludes with a discussion of an issue specific extension of the assessment tool and presents methods for setting priorities in the approach to corporate citizenship that may also facilitate corporate engagement with stakeholders The tools developed in this book provide practical and detailed guidance for implementing and embedding CC and managing corporate legitimacy It will be essential reading for practitioners looking for ways to legitimize their engagement with societal issues and for academics considering how we can better measure the engagement of business with CC
