

Design Patterns

*“ Each pattern describes a **problem** which occurs over and over again in our environment, and then describes the core of the **solution** to that problem, in such a way that you can use this solution a million times over, without ever doing it the same way twice”.*

--- Christopher Alexander, 1977

This was in describing patterns in buildings and towns.

In SE, design patterns are in terms of objects and interfaces, not walls and doors.

The manner in which a collection of interacting objects collaborate to accomplish a specific task or provide some specific functionality.
