Ancient Ivories In The Middle East 14 This Volume Only Series Qedem Monographs Of The Institute Of Archaeology:

From Nomadism to Monarchy? Ido Koch, Oded Lipschits, Omer Sergi, 2023-11-07 Archaeological exploration in the Central Highlands of the Southern Levant conducted during the 1970s and 1980s dramatically transformed the scholarly understanding of the early Iron Age and led to the publication of *From Nomadism to Monarchy Archaeological and Historical Aspects of Early Israel* by Israel Finkelstein and Nadav Na'aman This volume explores and reassesses the legacy of that foundational text Using current theoretical frameworks and taking into account new excavation data and methodologies from the natural sciences the seventeen essays in this volume examine the archaeology of the Southern Levant during the early Iron Age and the ways in which the period may be reflected in biblical accounts The variety of methodologies employed and the historical narratives presented within these contributions illuminate the multifaceted nature of contemporary research on this formative period Building upon Finkelstein and Na'aman's seminal study this work provides an essential update It will be welcomed by ancient historians scholars of early Israel and the early Iron Age Southern Levant and biblical scholars In addition to the editors the contributors to this volume are Eran Arie Erez Ben Yosef Cynthia Edenburg Israel Finkelstein Yuval Gadot Assaf Kleiman Gunnar Lehmann Defna Langgut Aren M Maeir Nadav Na'aman Thomas R Mer Lidar Sapir Hen Katja Soenneken Dieter Vieweger Ido Wachtel and Naama Yahalom Mack *Beyond Israel and Aram* Assaf Kleiman, 2022-11-21 In this study Assaf Kleiman discusses the settlement history and material culture of complex communities that flourished in the shadow of Israel and Aram Damascus A detailed examination of the finds from the Lebanese Beqaa through the Sea of Galilee to the Irbid Plateau offers an exceptional portrayal of the developments experienced by these communities before and after the emergence of the territorial kingdoms these advances include the rise and fall of local polities the adoption and rejection of certain cultural traits and even the background for the dissemination of writing The study provides therefore a new and exciting way to look at the political relations and cultural exchange between the indigenous communities and the elites that ruled over them Rather than interpreting the local populations simply as Israelites or Aramaeans the archaeological record reveals their diversity and highlights the discrete historical trajectories they followed from the 12th to 8th centuries BCE *The Archaeology of Israelite Society in Iron Age II* Avraham Faust, 2012-06-01 Referring to several important introductory books written about the archaeology of the land of Israel William Dever once stated However adequate these may be as introductions to the basic data none makes any attempt to organize the data in terms of social structure This is a serious deficiency in Syro-Palestinian and biblical archaeology when one considers that the general field of archaeology has been moving toward social archaeology for 20 years or more Dever *Social Structure in Palestine in the Iron Age II Period on the Eve of Destruction in The Archaeology of Society in the Holy Land* ed T E Levy London 1995 p 416 Lack of discussion of social questions has characterized the archaeology of the land of

Israel for some time even though around the world these questions constitute an important component of archaeological research see for instance the work of Renfrew Flannery Gibbon Blanton Dark Bahn Hodder Trigger and many others The Archaeology of Israelite Society in Iron Age II fills this gap and analyzes the structure of society in the ancient kingdoms of Israel and Judah from an archaeological viewpoint It also applies models and theories from the field of social and cognitive archaeology using the tools of various social science disciplines anthropology sociology economics geography and so on Due to his ability to use what is probably the largest archaeological data set in the world hundreds of planned excavations thousands of salvage excavations and extensive surveys all from the small region that was ancient Israel Avi Faust contributes not only to the study of ancient Israelite society but to the most fundamental questions about ancient societies These questions include the identification of socioeconomic stratification in the archaeological record the study of family and community organization the significance of pottery small finds and architecture as indicators of wealth and more This groundbreaking monograph is one of the first attempts at a large scale study of Israelite society based primarily on the archaeological evidence The following acknowledgments were inadvertently omitted from the front matter of the volume Amihai Mazar figure 31 Amnon Ben Tor figures 40 41 Israel Antiquities Authority figures 21 24 25 26 29 30 32 33 36 and Photo 5 Israel Exploration Society figures 11 13 15 17 18 19 27 42 Israel Finkelstein figure 28 Izhak Beit Arie figures 34 35 Shimon Dar figures 22 23 The Institute of Archaeology Tel Aviv University figures 7 8 The Institute of Archaeology the Hebrew University figures 40 41 Zeev Herzog figures 6 9 10 12 14 16 20

New Insights into the Iron Age Archaeology of Edom, Southern Jordan Erez Ben-Yosef, Thomas E. Levy, Mohammad Najjar, 2014-12-31 Situated south of the Dead Sea near the famous Nabatean capital of Petra the Faynan region in Jordan contains the largest deposits of copper ore in the southern Levant The Edom Lowlands Regional Archaeology Project ELRAP takes an anthropological archaeology approach to the deep time study of culture change in one of the Old World's most important locales for studying technological development Using innovative digital tools for data recording curation analyses and dissemination the researchers focused on ancient mining and metallurgy as the subject of surveys and excavations related to the Iron Age ca 1200-500 BCE when the first local historical state level societies appeared in this part of the eastern Mediterranean basin This comprehensive and important volume challenges the current scholarly consensus concerning the emergence and historicity of the Iron Age polity of biblical Edom and some of its neighbors such as ancient Israel Excavations and radiometric dating establish a new chronology for Edom adding almost 500 more years to the Iron Age including key periods of biblical history when David Solomon and the Egyptian pharaoh Shoshenq I are alleged to have interacted with Edom Included is a 7 gigabyte DVD with over 55 000 files of additional data and photographs from the project

The City in Ancient Israel Volkmar Fritz, 1995-01-01 Fritz traces not only the location layout size architecture building materials and water provision of Israelite cities but also their economics and the social organization of their inhabitants their everyday life administration and culture

He traces the history of urban life in the southern Levant from about 3000 BCE to the end of the biblical period. This comprehensive informative and entertaining account is illustrated throughout with concrete examples taken from the latest archaeological research illustrated with numerous maps and plans.

Living on the Fringe Israel Finkelstein, 1995. This book intended to be the first of three publications which as a whole aims to provide an overall synthesis of the long term settlement and demographic processes that took place in the arid zones of the southern Levant. It covers the period from the Early Bronze Age to the later Iron Age of the 7th-6th centuries BC with a focus on the general historical processes rather than specific sites or features.

Final Report of Excavations on The Hill of The Ophel by R.A.S. Macalister and J. Garrow Duncan 1923-1925 Garth Gilmour, 2024-07-31. Final Report of Excavations on the Hill of the Ophel by R A S Macalister and J Garrow Duncan 1923-1925 contains the publication of the finds from this excavation a century ago that have been curated and stored in the archives of the Palestine Exploration Fund in London. This volume includes a history of the excavation and detailed descriptions and illustrations of finds ranging from the Chalcolithic through to the Ottoman periods. These include pottery, metal, bone and glass objects, seal impressions, figurines, clay tobacco pipes and other items many of which have never been published before. Among the more significant finds from the excavation both the subject of special studies are an incised pottery sherd with images of two deity figurines interpreted as representing Yahweh and Asherah and two incense burners that contribute to our understanding of the trade in incense in the Near East in the second and first millennia BCE. This volume will be of interest to students and researchers of ancient near eastern archaeology and particularly those engaged in research in the southern Levant. The report complements the publications of the many subsequent excavations in the same area of Jerusalem a location that is still today the focus of much attention for historical, religious and political not to mention archaeological reasons.

Beyond Israel and Aram Assaf Kleiman, 2022. In this study Assaf Kleiman discusses the settlement history and material culture of complex communities that flourished in the shadow of Israel and Aram Damascus. A detailed examination of the finds from the Lebanese Beqaa through the Sea of Galilee to the Irbid Plateau offers an exceptional portrayal of the developments experienced by these communities before and after the emergence of the territorial kingdoms. These advances include the rise and fall of local polities, the adoption and rejection of certain cultural traits and even the background for the dissemination of writing. The study provides therefore a new and exciting way to look at the political relations and cultural exchange between the indigenous communities and the elites that ruled over them. Rather than interpreting the local populations simply as Israelites or Aramaeans, the archaeological record reveals their diversity and highlights the discrete historical trajectories they followed from the 12th to 8th centuries BCE.
