 the many pitfalls which may be encountered by beginners and may sometimes beset those more experienced The first few
 chapters of this book are devoted to the choice and organization of the laboratory rooms and their equipment including
 glassware instruments etc Attention is also given to methods of preparation of supplies for use in the various techniques The
 succeeding chapters describe the preparation of the culture media and the tissues as well as the preparation of the cultures
 in various ways Also discussed are the types of cells one may expect to see growing from a given tissue methods of recording
 their behavior and measuring their growth as well as their significance in the interpretation of experimental results The last
 chapters treat methods of applying micrurgical histological and photomicrographic techniques to tissue cultures It is hoped
 that the carefully considered data presented in this book and the many details which are the result of long experience may be
