Claim:

There are different aquatic systems with diverse organisms.

Evidence	Reasoning/Justification
Aquatic ecosystems have abiotic - temp, light, salinity, depth	Different organisms can tolerate different factors
Some organisms prefer fresh water vs. saltwater. Bull sharks + manatees tolerate both	Bull sharks and manatees are very different, but tolerate same conditions
Depth reduces light and increases pressure. Organisms deal with this differently.	Many types of adaptations exist to survive in these conditions
The geography of an aquatic environment can determine the life forms present.	Continental shelf gets lots of light, so there's many living things. Not so in the abyss.
Photosynthesis takes place in the neritic zone.	It is the most productive area of the ocean. Plankton are base of food chain.
Metabolism is affected by temp. Many species are cold-blooded.	Organisms can migrate or must have adaptations to survive.

to inform the structure of CALL courses tasks and activities *Flip Your Classroom* Jonathan Bergmann, Aaron Sams, 2013

This revised edition of the groundbreaking book shares innovators Jonathan Bergmann and Aaron Sams's insights on how to successfully flip a classroom and covers new advances in the field. It started with a simple observation: Students need their teachers present to answer questions or to provide help if they get stuck on an assignment; they don't need their teachers present to listen to a lecture or review content. From there, Jon Bergmann and Aaron Sams began the flipped classroom. Students watched recorded lectures for homework and completed their assignments, labs, and tests in class with their teacher available. What they found was that their students demonstrated a deeper understanding of the material than ever before. This is the authors' story, updated and expanded to ensure it's as relevant to your classroom as ever. The revised edition includes new case studies illustrating flipped learning applied by an individual teacher and across a school district. A new appendix focused on best practices for creating videos for your classes. Educator examples that demonstrate the ISTE Standards in action. Updates to tools, terms, and resources to reflect the current learning landscape. In the revised edition of this landmark text, you'll discover the flipped mastery model that allows students to learn at their own pace, furthering opportunities for personalized education. This simple concept is easily replicable in any classroom, doesn't cost much to implement, and helps foster self-directed learning. Audience: Elementary and secondary classroom teachers **Note-taking for Consecutive Interpreting** Andrew Gillies, 2014-07-16

Aimed at students of conference interpreting, whether on university and professional training courses or self-learners, *Note Taking for Consecutive Interpreting: A short Course* offers future interpreters a step-by-step guide to the skill of note-taking, which forms an essential part of consecutive interpreting. The system proposed, made up of a range of tried and tested techniques, is simple to learn, consistent, and efficient. This is a book which can be read at one sitting but is designed to be worked through over a number of months. Each chapter presents a technique together with examples, tasks, and exercises for the reader to complete, true to the motto: learning by doing. The book uses English throughout, explaining how and where to locate material for other languages. It thus constitutes a course which offers student interpreters in any language combination a sound and adaptable base on which to build as they develop their skills. It will also be a valuable resource for interpreter trainers looking for innovative ways of approaching this core element of interpreter competence **Successful Inclusion Strategies for Secondary and Middle School Teachers** M.
