Scientific and technical contacts between nations have necessitated the publication of various language textbooks manuals and reference books Particularly important among them are multilingual scientific and technical dictionaries This English German French Dutch Russian Dictionary of Scientific and Technical Terms contains some 9000 entries The main feature of the Dictionary is that it includes first and foremost general scientific terms needed by an engineer working in any branch of science and technology Besides the Dictionary includes the basic terms used in physics mathematics the fundamentals of electrical engineering and chemistry and also the most essential terms pertaining to manufacturing processes machine design testing methods etc The Compilers were confronted with a difficult task as nowadays science and technology are developing rapidly and the minimum scientific and technical vocabulary required by a specialist is increasing accordingly The Compilers have taken special pains to include the entire basic modern technical vocabulary omitting superfluous words and phrases They have tried to solve this problem by selecting mainly those scientific and technical terms which constitute the basis of a specialised vocabulary Therefore the Dictionary includes the vocabulary pertaining to general study courses in mathematics physics and chemistry and also in electrical engineering electronics and machine design given in technical colleges irrespective of their specification This lends the Dictionary an all purpose character making it equally useful to scientists and engineers of different countries who have graduated from colleges with different curricula
